Horlicks and the

XIVth Olympiad

AS in Amsterdam in 1928 and in Berlin in 1936, so in London in 1948, arrangements were made with the Organizing Committee whereby Horlicks was made available to every competitor of every nation taking part in the London Games.

Served both as a bedtime drink and at the various stadia during the competitions, Horlicks has again proved its popularity amongst famous athletes.

You can't spend what you haven't got

Every good athlete knows that if he wants to give of his best he must, amongst other things, renew and maintam nis reserves of energy. If he loses these reserves, he is in the position of trying to spend what he hasn't got.

Nature's way is to replace lost energy during sleep—but it must be the right kind of sleep. Horlicks, taken last thing at night, helps you to get the kind of deep, refreshing sleep you need. Next morning you wake with a new store of energy and vitality. For this reason, leading athletes, whenever they can, take Horlicks at night, especially during training.

HORLICKS

SLOUGH, BUCKS, ENGLAND
RACINE, WISCONSIN, U.S.A.

These messages from Mr. J. Sigfrid Edström, President of the International Olympic Committee, and Viscount Portal, President of the London Olympic Games of 1948, express the spirit, the idealism permeating a movement which inspires the peoples of the world

"To Love the Game beyond

HE staging of the Olympic Games in London this year was recognised as the most crucial occasion in the history of sport. How could such a project in the Grand Manner be accomplished in the threadbare and impoverished world of 1948 ?

It was a challenge to the British genius for improvisation, for Britain had to hold the Games in a city afflicted with an unparalleled housing shortage-yet homes had to be found for tens of thousands of foreign visitors, not to mention some 6,000 athletes.

The great test was taken; and the organisation rose gloriously to the supreme challenge. The visitors were housed and fed; the athletes were made at home in camps where every care was taken of their waking and sleeping

Wembley Stadium itself, where day after day huge crowds assembled, surpassed in magnificence and convenience any previous home of the Games. All the other Olympic venues were, too, splendidly organised both from the spectators' and the competitors' points of view. Torquay I found much nicer than Nice; Henley recaptured the atmosphere of the old, old days, while at Aldershot and Sandhurst competitions went on in the friendliest manner.

In my visits to the Olympic venues and camps I found everywhere young athletes meeting in comradeship and making ties of friendship. These, I am sure, will remain all their lives, and will one day, I hope, help to create the brotherhood of man which is so necessary for the peace of

So the Games went on smoothly and splendidly from a brilliant opening to a majestic and moving end. When 82,000 spectators at the Closing Ceremony sang together "Let us be glad," written by Sir Alan Herbert, my eyes were filled with tears . . . and I was not alone. The first Olympic Games for twelve years have come and gonean unqualified success.

On behalf of the International Olympic Committee and all participants at the Games, I say a hearty "Thank you" to Britain. I congratulate the organisers on their triumph, and the British Olympic Association for producing so complete a record of these memorable events.

1. Edation

President of the International Olympic Committee

the Prize"

HE Games are over. A good deal of pessimism was evinced when it was announced that the first of the post-war Olympic meetings was to take place in London, a city which comparatively recently was subjected to an ordeal which made people outside this country won-

der whether we would be able to stage the Games. Today we can hope that the pessimists consider themselves proved wrong. Crowds unprecedented in the history of sport watched athletes from 59 countries competing against each other in 136 events. What did they see They saw the best sight that could have graced the eyes of the watching world. They saw sportsmanship as well as

The tension of the great occasion (and every final was the supreme effort of each competitor's life) never allowed the result to overshadow the Olympic ideal of chivalry and comradeship. Sir Henry Newbolt summed the whole matter up in a poem written just fifty years ago :

To set the Cause above renown To love the game beyond the prize, To honour, while you strike him down, The foe that comes with fearless eyes,

To count the life of battle good, And dear the land that gave you birth ; That binds the brave of all the earth.

The crowds who watched saw that, when the closest race was won, the man-or woman-who finished second always somehow found breath enough to run across to offer the winner the hearty handclasp of congratulation.

The Games' fortnight brought together more different types of temperament than there are circles in the Olympic badge: Dutch phlegm, English sangfroid, Mediterranean volatility among them. There were historical parallels for wondering whether

dispute and strife would not be the end of so diverse a gathering. But the world saw sport reach new heights of keenness. Innumerable fresh Olympic records were set up, and all was accomplished in an atmosphere friendly and happy from first day to last. The champions of five continents mingled and met on the field of high endeavour -and they parted as brothers.

I cannot conclude my remarks without attesting to the help we have received, since these Olympic Games were planned, from WORLD SPORTS. It keeps our objects and our views in front of the public, and plays its part in making these Games a success.

President of the London Olympic Games and of the British Olympic Association.

With the words quoted below, His Majesty King George VI, who is Patron of the British Olympic Association, declared open the London Olympic Games at Wembley Stadium on July 29th, 1948.

"I proclaim open the Olympic Games of London celebratias the XIVth Olympiad of the Moder's Leas

The Olympic Games in Retrospect

By The Rt. Hon. PHILIP NOEL-BAKER, M.P.

Secretary of State for Commonwealth Relations, who was sixth in the Olympic Games 1,500 metres at Stockholm in 1912 and second at Antwerp in 1920, and who captained the British Olympic Team in 1920 and 1924,

Games were held, a Greek maiden kindled the Olympic Flame. She the same ceremony and in the self-

same lamp which the ancient Greeks had used. Then she took the lamp across to the sacred precincts where the heart of Pierre de Coubertin, the founder of the Modern Games, lies

A soldier, weapons in hand, stepped forward. He laid his weapons upon the ground, took off his uniform, and in runner's shorts and vest he lit his torch at the maiden's lamp and, with a salute, set out to run the first of the 2,000 miles from Greece to Britain

Twelve days later a British runner carried the torch into the Olympic Stadium at Wembley. No one who saw it will forget that thrilling spectacle. The Statiers gay with the suffused colours of the 80,000 people in their summer clothes the teams in white, red, green and blue lined up across the centre; the massed 7,000 pigeons filling the great arena with the beating of their wings and the flickering of their shadows on the ground . . was to this moving scene that the torch-

Tall and handsome like a young Greek god, he stood for a moment in the sunshine, held the torch aloft to salute the concourse, then ran in perfect rhythm round the track, saluted again, and lit the Flame in the bowl where, day and night, it burned until the Games were done

Looking back, I think that what most remains is the beauty of the Games. The Stadium, even when it rained, was always

and always lovely. The Olympic Pool, too, was always lovely, but loveliest I think, at night. The flags of the 59 nations from above, the spectators dimly seen in shadow, the flashing figures of the divers as they plunged, the grace and power of the swimmers as they raced—all this was no less memorable, no less vividly remembered than the Stadium itself. Or Henley on the day of the Olympic finals, with the water glittering, the trees shining in the sun, the crews moving in perfect symmetry down the course. Or Torbay on the day of the vachting finals: "A more glorious day of sport," said The Times, "can never have gladdened the heart of man. An arena of wonderful beauty whose waters, if not wine-dark, were foam-flecked and sun-lit, of sail, each the centre of a struggle of inexpressible intensity." And in every sport the beauty of the Games was somehow

contests. Never, indeed, had there been more glorious sport. Which was the greater thrill? Was it the roo metres, with the crowd hushed to absolute silence for the start and roused to absolute pandemonium for the finish? Or the 400 metres, with the runners sweeping in gradually-converging echelon round the track, with Wint—the great and gallant Wint-coming down the straight in giant strides to snatch the title from McKenley on the post? Or the 10,000 metres, when Czech, for the last two miles or more, as he double-lapped opponents to beat the best Olympic time? Or the Women's Relay in the Pool, when Ann Curtis swam as never woman swam before to win for America by a touch? Or the final of the Pairs at

merged with the tense excitement of the

that men and horses ever had to face? But I am not writing this to remind you of the contests which you read about, or saw am not writing to thank or to congratulate Modern Games. I am writing to ask how far we've gone to bring about the things Baron de Coubertin had three things in view. He wanted to raise the standards of physique, to make young men and women

Henley, when Laurie and Wilson, back from ten years' service in the Sudan, won

a glorious victory for Britain? Or the Football Final, in which, by classic passing, Sweden beat the Yugoslavs? Or the Prix des

run better, swim better, play better, and so to make them stronger and healthier and happier than they were before, Next the world. He wanted everyone in every nation to have the chance to play. And above all else, he wanted to bring the Youth of every continent together to form, by them, and so to make less likely the hatefu

Well, what has the Olympic movement every sport the standards of skill and strength, of speed and of endurance have

The second purpose? Fifty years ago our modern sports were hardly known beyond the English-speaking world; in 1948 we had splendid teams from every continentfrom Sweden, Denmark, France, Hungary and the Argentine, whose all-round brilliance shows that their peoples, like the ancient Greeks, are becoming a nation of athletes Afghanistan sent a football eleven which made a worthy showing against a European (Continued overleaf)

Wing-Commander Donald Finlay (Great Britain) pronounces the Olympic Oath on behalf of all competitors. . . "We swear the honour of our country and the glory of

66 The important thing in the Olympic Games is not to win, but to take part. The important thing in life is not the triumph, but the struggle. The essential thing is not to have conquered, but to have fought well. . . 99

PIERRE de COUBERTIN. Founder of the Modern Games.

Belgium won the 5,000 metres, and her Marathon runner, Gailly, most heroic of all losers, was first into the Stadium, though not the first to reach the tape. The Argentine not only won the Marathon but had three men in the first ten; China and Korea were prominent throughout. India won the hockey tournament; Turkey was supreme in wrestling and did well in other sports; Ceylon sent Duncan White, who, in the first big race he ever ran, broke the Olympic record and came second in the 400 metres hurdles, one of the most exacting tests of all.

Britain, in rowing, in yachting, in boxing, in cycling, did better than for many years. We were second in hockey and fourth in football-and even on the track we did, in my view, reasonably well. If we didn't do better, it was because some 6,000 athletes the cream of many millions, came from all the continents to take part. It is not the young men only who have shared this movement. Mrs. Blankers-Koen, Miss Ostermeyer, Miss Maureen Gardner, Miss Manley, Miss Strickland and others, have made such progress that the women's finals were among the most dramatic and most attractive of the track and field events.

But, to the founder, his third purpose was far more important than the rest. He hoped to touch the hearts and stir the imagination of the young men and women who some day would be leaders in their countries' national affairs. That was why and his symbolism from the ancient Greeks. The ancient Games drew to Olympia from all parts of Greece a mighty concourse of spectators-more than 40,000 strong. The Games did much to form the Hellenic way of life. Pindar, the poet, in his Olympic hymn explains the philosophy which that life is made up of ordeals to be faced and conquered, and that long training, self-discipline and self-sacrifice are needed a money prize-it was a crown of olives cut

And to the ancient Greeks the Games were the symbol of the unity of civilised mankind : they brought a truce to war : they were the inspiration of the art and the poetry of Greece. Lysias and Isocrates, the orators, went there to preach their gospel of peace

Ever since I ran in Stockholm 36 years ago, I have never doubted that the Modern Games can touch the hearts and stir the imaginations of the athletes. For twenty years I lived among the teams, and I could the Olympic Oath was honoured, and how strong and lasting were the friendships made. In London, thanks to the leaders of the teams-not least our own-this, the founder's purpose, was abundantly fulfilled. Of course, the boxers had their troubles with the judges. Until their International Federation clarifies its rules, they always will. But, be it noted, the boxers had no troubles among themselves. And I have a host of pictures in my mind from these Games which show the spirit of the com-

petitors-the runners in a little cluster

shaking hands before the start; a Hun-

garian player almost drowning an Egyptian

footballers shaking hands after they had

having tea together when their race was over: the final Ball, where Athletes from 59 countries danced together on the night they said farewell

Let me tell a story which sums up what I've tried to say. After that last magic party, with the brilliant scene still vivid in my mind. I picked up an athlete from Cenhim if he had been comfortable in his camp and if he'd been happy at the Games. He said, in halting English

"I am in camp at Uxbridge and it is oh, so good. I am swimmer. I not swim well at Wembley-better, I hope, in 1952. I was 14 when the war began for first time now I meet English, Ameri Dutch; I find we have things in comare friends. For three weeks I am happy, happier than I have ever been. In the Stadium and in the Pool it was so beautiful and so great."

And what the athletes feel, is felt, I am certain, by the great mass of the peoples who sent them here. There are hundreds of millions of them who don't care much for government or politics, but who did care much for this. Outside the Stadium after the Closing Ceremony I was wedged tight in the crowd beside the father of heard him say to his wife and daughters, it was more wonderful than anything we've ever seen. Most likely we'll never see the Games again, but we shan't forget this all our lives."

When I was young, clever highbrows called the Modern Games a faked antique. Have they been a faked antique? Not to the Greek girl who lit the Flame; not to the runners of many nations who spanned the continent of Europe and brought is here; not to the crowds of people who lined the roadside and applauded; not to those who waited to touch the torches of the runners; not to the competitors, who will remember all their lives their few seconds or minutes of intensive effort not to the spectators who have seen and understood the spectacle of the Modern Games. The Games are not a faked antique -they answer something universal and eternal in the human heart, something which very visibly has touched the athletes

and nations of the world. At the Closing Ceremony, the President of the International Olympic Committee, Mr. Sigfrid Edström, said: "The Games cannot enforce the peace to which all humanity aspires, but they give the opportunity to the youth of the world to find out

that all men on earth are brothers. In the troubled times in which we live, the Games of 1948 were a bold adventure. They have succeeded beyond all hopes; they stand out as something virile, clean and noble. At the Stadium, the flag which links the continents has been lowered the flame is out. But the Olympic spirit lingers, and it leaves us a vision and a hope.

The spirit of the Olympic Games. which has tarried here awhile, sets forth once more. May it prosper throughout the world. safe in the keeping of all those who have felt its noble impulse in this great festival of sport.99 XIVth Olympiad Closing Ceremony message.

Mr. Sigfrid Edström, President of the International Olympic Committee, about to give the Olympic Flag to the Lord Mayor of London for safe keeping until 1952.

CITIUS—ALTIUS—FORTIUS

Commentary on the Men's Track and Field events of the XIVth Olympiad (Wembley Stadium, July 30 — August 7), in which the Olympic motto was exemplified by the setting up of eight new records.

CCORDING to the Official Pro-A gramme, 815 athletes from 53 different countries came to Wembley Stadium for the 33 track and field events of the 1948 London Olympic Games. Thirty-five of these athletes (including the three relay teams) gained gold medals. I have no doubt that, remembering all the disappointments of the "nearlies" but "not-quites," the vast majority of the 780 competitors who did not gain gold medals found the Games thoroughly worthwhile.

In this, the first Olympic meeting after World War II, Great Britain was given the opportunity of setting a new standard for the Games, a standard of sportsmanship of which we might all be justly proud. I am sure that this was achieved, and that the XIVth Olympiad can fairly be regarded as a model for all time.

For the most part, the track and field events were well organised. There were mistakes and deficiencies which an Official Report should mention, not in any spirit of carping criticism, but in order that a fair picture of the whole can be given and that others may benefit.

It was a mistake that the entries in the programme were numbered by events and not by countries. That mistake having been made, it was accentuated by the adop tion of the procedure which, after numbering the entries by countries for each event, ther put the athletes in alphabetical order, irrespective of country. There were mistakes, too, with the arrangement of heats which leads me to suggest most strongly that at future Olympics it is insisted that the managers of the various teams indicate to the Organising Committee, forty-eight hours before an event, the names of those who will actually compete. A small committee of two or three, with no other task on handshould arrange the heats and supervise the programme

There must, also, be a qualifying standard for the decathlon, while the qualifying standard in some of the field events must be raised. No final field event should take more than I hours-it just is not fair to

The draw for positions, too, must take place before the programme is printed. I gather that the International Amateur sanction this, though provision is made for such a procedure in the LA.A.F. Rules Much time was wasted in drawing for positions before the start of races and in

Again, Victory Ceremonies must be staged at pre-determined times. On more than one occasion at Wembley athletes were kept waiting for as much as half-an-hour while some champion in another sport was summoned to the victory dais. I do not wish to decry other events, but it was gramme-in more than one case actually interrupt competitors during a field event final and at a critical time-while National Anthems blared forth. If these ceremonies

_ hv __ HAROLD ABRAHAMS Winner of the Olympic Games 100 metres,

must take place in the Stadium, have them at definitely fixed times. Having made these few criticisms, how-

ever, let me say at once that no praise can be too great for the wonderful organisation at Wembley. The thousand and one things that went absolutely right-the scoreboard, the photo-finish apparatus, the remote starting (there was not a single bad start throughout the meeting)-more than outweighed the one or two deficiencies, which can easily be avoided at Helsinki in 1952. Considerable doubt was felt as to whether the temporary and specially-laid track would prove adequate for a meeting of such high standards. The number of class performances supplied the unassailable answer. I am not so foolish as to suppose that a permanent track, laid sufficiently well in advance, might not have been better, but there was very little wrong with the

Over the eight days of competitions, Olympic records were set up in the 800 metres, 5,000 metres, 10,000 metres, 10,000 metres walk, 110 and 400 metres hurdles, and the weight and discus so far as the men's events were concerned, and equalled in the 100 metres and the 400 metres. A world and, of course, Olympic record was made in the 80 metres hurdles, and new Olympic records in the women's high jump

The winner of the 100 metres, Harrison Dillard, did 10.3 sees., which equalled Tolan's in Los Angeles. But Owens also did 10.2 in a heat in the 1936 Games, with a favourable wind which debarred him from a world record. Some people do not regard this time as an Olympic record, and, in -that is to say, the facts and figures are not submitted to any committee as in the case of world records. Indeed, so far as the Olympics are concerned, it would be more accurate to talk about "Best Per-

Of the thirty-three track and field events, the United States won 12, Sweden 5, the Netherlands 4, France and Hungary 2, and Finland, Australia, Jamaica, Italy, Argentina, Czechoslovakia, Belgium and Austria one apiece. Thirteen countries provided one or more athletes in the first three, and 25 countries one or more athletes in the first six. This is the greatest number of countries who have ever scored in the Games, and I am delighted to see the honours being more widely distributed. Taking the first three as a criterion (they

are the only ones who receive victory medals), of the 99 places available, four countries-the United States (27), Sweden (12), France (8), Great Britain (7)—collected more than half.

What were the outstanding moments of that wonderful eight days' sport? There are really almost too many to mention, but let us look at them together, you and I, in

FIRST DAY

Everyone was eager to see what kind of performances would be accomplished on the specially laid new track, but there was lanes for the hurdles were measured-a delay which, of course, should never have occurred and which upset the whole day's programme. Easy to say from the stand surmise that worse would follow, but this was one of the few really serious defects in the whole eight days' proceedings. At last, Cochran, world record-holder for 440 yards secs., while in the last heat Duncan White, of Ceylon, won easily enough in 53.6 secs. felt at once that there were definite possibilities about this performer.

(Continued on page 13)

se abstar

R. B. Cochran (U.S.) cle vs Ca

to win the 400 m, hurdles to in 51.1 secs .- a new Olympic record

THE ANGLOBASQUE BERET

Kangol is the official choice for all the British teams in Games

Gaston Reiff (Belgium) assisted off the track by admirers after beating Emil Zatopek in a desperate race for the 5.000 metres.

We got our first glimpses of the American coloured men, Ewell and Dillard, in the 100 metres heats, and we saw some impressive sprinting by Mel Patton. What a thrill, too, when all three of Great Britain's sprinters reached the semi-finals. The heats of the 800 metres revealed what a beautiful runner is Malvin Whitfield, and how easily Arthur Wint, of Jamaica, was running. In the high jump Australia's Winter overcame the three Americans and, to complete the first afternoon, the Olympic record was beaten twice within a few minutes in the semifinals of the 400 metres hurdles and in the Zatopek, challenged and annihilated the with his most unusual and, be it confessed, ungainly style to shatter the previous Olympic best. Nothing much wrong with the track, anyway,

SECOND DAY

A perfect afternoon, except that it was surely too warm for the 50,000 metres walkers, twenty-one of whom left the Stadium at half past one. By the time of the 100 metres semi-finals the vast Stadium was packed to overflowing. McCorquodale and McDonald Bailey both reached the final -the first time Britain had ever had twe finalists in this event. While we waited for this, news came that Whitlock had fallen out in the walk and that the Swede, Ljunggren, had a commanding lead. Three semifinals of the 800 metres followed, with Parlett running brilliantly to qualify and Wint almost more impressive than on the previous afternoon. Next was a marvellous 400 metres hurdles final, with Cochran absolutely superb and the previous Olympic record beaten by 4/5 sec.

The 100 metres final saw Dillard and Ewell first and second, with McCorquodale,

the first white man home, in fourth position. The heats of the 5,000 metres one remembered for a popular but quite absurd battle between Zatopek and the Swede, Ahlden. Finally, there was the easy Swedish victory in the walk, with T. Lloyd Johnson first man home for Great Britain—the same done magnificently to gain a position in the British team at the age of 48.

THIRD DAY

August Bank Holiday-another packed Stadium, but the weather had broken. The running of Herbert McKenley in the 200 metres preliminaries was most impressive. and one had no difficulty in believing that he had covered 400 metres in the U.S.A. inside 46 secs. That 800 metres final had me hoping against judgment that Parlett really would spring a surprise for Britain, yet one knew all the while that it really could not be so. A most thrilling 5,000 metres, run in a downpour, featured clever tactics by the Belgian, Reiff, and an unbelievable last-minute (literally last-minute) dash of Zatopek, who failed by less than a yard to close a gap which he ought never to have permitted.

FOURTH DAY

A great come-back was made by Patton, who won the 200 metres, while another American, Thompson did some fantastic weight-putting—over 56 feet.
The heats of the 110 metres hurdles saw Donald Finlay leading over the first eight hurdles with his perfect precision, every stride punctuated by applause from the crowd. And then the unbelievable Finlay hit a hurdle and knocked it down, The groans as he fell headlong and rolled over and over were a pathetic conclusion to a brilliant career.

FIFTH DAY

The final of the 110 metres hurdles, when Porter (U.S.A.), having equalled the Olympic record in his semi-final, set up new figures, 13.9 secs., beating, incidentally the previous British record made by Forrest Towns in 1936, by half a second, was a leading feature. We saw, too, a courageous effort by Roberts in the 400 metres second round, and most convincing running by Wint in the two preliminary rounds of this event. In the heats of the 1,500 metres times were clocked equal to many Olympic

SIXTH DAY

This was devoted mainly to the decathlon, with the semi-final and final of the 400 metres plus the steeplechase. Great Britain was not concerned in the latter, but the great team-work of the Swedes and the eclipse of the European champion, Puiazon of France, were well worth seeing. In the 400 metres final Arthur Wint, who might well have been representing the Mother Country, showed his greatest form, running at least a whole second faster than he had ever run before in this country, to beat his fellow-Jamaican, the world record-holder, Herbert McKenley, in as magnificent a finish as anyone could wish to witness.

SEVENTH DAY

By this time most of us were feeling a trifle exhausted, for so much had happened in so short a time. On the twelfth anniversary of Lovelock's wonderful world record in the 1,500 metres, we expected, with such

a fine field, that yet one more Olympic record would be accomplished. But the appalling conditions made this well-nigh 49.8 secs .- two seconds slower than Lovelock—was remarkable. This was the longest day of all, with the decathlon finishing after half past ten at night.

LAST DAY

The final day saw the Stadium again packed with eager spectators. Britain was still without a victory, but we had hopes that we might possibly win the 10,000 metres walk, the Marathon and the women's high jump. They were in vain. Churcher, in the walk, was much below his best form. though in any event I must express doubts whether he could have defeated Mikaelsson. of Sweden, the winner. In the Marathon, our chief hope, Holden, did not complete Olympic gold medal, he might have found that tiny fraction of sixteen seconds,

What a climax to the week's athletics was the women's high jump, the event which Olympics! Thousands stayed on to see Britain's Mrs. Tyler battle against America's Miss Coachman long after everything else had finished-a fine tribute to the courage and skill of the performers, and something which dismissed for ever the suggestion wonderfully exciting. The fact that Mrs. Tyler shared in the honour of an Olympic victory, put in the proper perspective the extremely narrow margin which divides

U.S.A. AGAIN

Two things remain-to give an over-all picture of the competitions and to discuss Great Britain. The athletes from the United States, as

(Continued overleaf)

Emil Zatopek (Czecho following his magnificent ruckway wicte the 10,000 m, in record time-

usual, dominated the men's track and field events. As time passes, however, we must expect that more and me propulation expect that more and me propulation theory of the U.S.A. more by reason of its make-up than its magnitude, must always result in the propulation frequency of the propulation frequency of the propulation frequency of the propulation of the 2 included in men's events, all himself of the 2 included in men's events, all himself of the propulation of t

in the first six. Sweden did better than ever before, reaching the finals of 14 events and one relay. The British Empire (including Great Britain) was represented in the finals of every track event except the 5,000 metres and steeplechase. But there were no placed representatives in the pole vault, weight, discus, hammer or javelin. Finland had her worst Games since she became so only, in the javelin. She had no place winner in any of the track events, save a fifth place in the steeplechase and a rather courtesy fourth place in the 1,600 metres relay. Certainly war and food conditions were very largely responsible for this, but I have little doubt that Finland will rise again.

BRITAIN'S PART

My comments on Great Britain's representatives must not be taken in any sense as an apology. Taken all in all, I do not think there is any cause for recrimination or exaggerated disappointment. Many of our athletes, indeed the majority of them, did as well as any reasonable critic could require, and some of them did better than we had any right to expect.

In the 100 metres we had two finalises from the first time, while our third representative, K. J. Jones, resched the semi-final down the control of the cont

Our distance runners in the 5,500 and 10,000 misres were outclassed, as were out steepleshaters. We have to learn in this country that speed from the gun is the secret of achievement in modern distance running. Holden was definitely a disappointment in the Marathon, but Richards ran suscribt to finish second.

Our walkers gained two places in each of the walkers on as good as we hoped, but by no means to be despised. We have to confess that hurdling in this country is in the doldrums, but in J. R. Birrell there is great hope for the future, and H. Whittle very nearly reached the final in the 400 metres hurdles with a time which only Lord Burghley has bettered so far as British hurdlers are concerned.

We are still deficient in field events

performers. Alm Paterson had shown the predictable ability to clear heights which be predictable ability to clear heights which is considered to the predictable and consistency on only be achieved after years of persistent application. But a speak and consistency on only be achieved after years of persistent application. But a speak weight puri of 48 ft. 6 in. This would have achieved a place in the first six twenty years apply. Datt. ji, of course, not good concipt

For all that, I have no doubt at all that British athletics is on the upgrade. The spread of coaching will produce its futule spread of coaching will produce its futule number of finalists which we gain there, but judged by the part our field events performers will by then play in a normal performer will by then play in a normal four previous Olympiads, I can say without caggeration that no British team has ever shown more keeniness in its preparations, field athletics is higher now than it has ever

As for our women, no praise can be too great for their all-round performances. That they were without a single Olympic tile was not due to their deficiencies but to the superior ability of their opponents. Though there were one or two disappointing exceptions, they may feel proud of their achievements.

THE " MAGIC EYE "AT WEINBLEY. Photo-finish camera shows you how they finished in the finals of the Women's 50 m. thredle [left] and the men's 10 m. (below). The camera catches each competitor as he or she reaches the finish, and by drawing a line through the catches each competitor as he or she reaches the finish, and by drawing a line through the finish catches and the catch

400 METRES

(437 yds. I ft.)

WORLD RECORD :- H. McKenley (Jamaica), 1948-45.9 secs. OLYMPIC RECORD :-- W. A. Carr (U.S.A.), 1932, and A. Wint,

(lamaica), 1948-46.2 secs. Of the sixy entries, eight had recorded better time than 47 secs, before the Games, and it was, of course, Herbert McKenley—on July 2 he set up a world record of 45,9 secs—who was expected to gain the title. The United States coaches were delighted when McKenley decided to run in the 200 metres, as they believed that this would tell against

his 400 metres running. has 400 metres running.
In the first two rounds it was Arthur Wint, British A.A.A. 440 and 880 yards champion
in 1946, who impressed enormously. The British representatives survived the first round,
and the British regards, Dill Roberts, a finalist at Berlin in 1936, failed by a narrow margin
to reach the semi-final. Wint's running in the first semi-final was great. He did 46.5—
1/1 to sec. outside the Olympic record, and be best crotta (Austrial) and Whitfield (U.S.A.)

As at the previous two Games, the final was a British Empire-United States affair. The order of starting was Bolen (U.S.A.) on the inside, then McKenley (Jamaica), followed by Wint (Jamaica), Whitfield, Guida (U.S.A.) and Curotta. McKenley started off like a whitwind, and by half-distance he must have been a least half-a-doory navial shade of the most have been a least half-a-doory navial shade of the most have been a least half-a-doory navial shade of the most have been a least half-a-doory navial shade of the most have been a least half-a-doory navial shade of the most have been a least half-a-doory navial shade of the most have been a least half-a-doory navial shade of the most half-a-doory navial shade McKenley started off like a whirivini, and by half-distance he must have been at least half-dozen yards sheed of Wint.

But on entering the home straight, which is than 102 yards to go, it was pain that McKenley had also this bolt, and when Wint, with his entermous studies, began to dozen the pain of the which will be the property of the pain of the which will be the pain of the pain of the which the pain of the pain of the which we have the pain of the pain

Three heats saw the elimination of all Great Britain's contestants. In heat 2 Czeche slovakia's Zatopek, who on the previous day had won the 10,000 metres, and Ahlden (Sweden) decided to fight out the finish like a couple of 400m, runners, though the third man (four were to qualify) was the best part of 100 metres to the rear, and the fourth nearly half a lap behind. The crowd enjoyed this tussle, but it was all unnecessary.

The final saw three Finns, three Swedes, two Belgians, and one representative each from Czechoslovakia, the Netherlands, Norway and U.S.A. I had envisaged this race being won in 14 mins. 10 secs .- an average of 68 seconds for each lap, and it is of interest mention that except for the last lap, for which I had anticipated 62 seconds, and which in fact occupied 69.6, the times of the leader never varied more than two seconds from the schedule. Indeed, the times for 3, 2 and 1 laps from home were exact. Under good

conditions there is little doubt that 14 mins, 10 secs, would have been bettered. By about half-distance the race had resolved itself into a duel between Zatopek, Reiff and Slijkhuis. Three laps from home Reiff suddenly spurted, increasing his speed over one lap from 71.2 sees, to 67.3 sees. At the bell Relif was twenty yards or so in front of Slijkhuis, with Zatopek rather further behind the Dutchman. All seemed over 300 yards from home, however, Zatopek started the most "fantastic" spurt. He quickly caught Slijkhuis and began to close the gap between himself and Reiff. The crowd were in an uproar. Whether or not Reiff sensed what was happening one cannot know,

numeri ana kein. The trown were in an option: whether on the case he may be used to cross the line a bere yard ahead of his opponent.

There has been much speculation as to the reason for Zatopek's somewhat eccentric running. Was he caught napping three laps from home? Why did he allow Refit to get so far shead? Surely any man who could produce such a finishing zech was capable of first Olympic track

winning the race-nothing	ow such a gap to open? Whatever should detract from the fine ach beat the previous Olympic record	ievement which gave to E	lelgium her i

10.000 METRES

(6 miles 376 yds.)

WORLD RECORD :-- Y. Heino (Finland), 1944-29 mins. 35.4 secs. OLYMPIC RECORD: E. Zatopek (Czechoslovakia), 1948-29 mins, 59.6 secs.

PREVIOUS OLYMPIC RECORD :-- J. Kusocinski (Poland), 1932 -- 30 mins, 11.4 secs,

In this, the first Olympic track title to be decided, everyone anticipated a fine duel between the world record-holder, Heino, and the Czech, Emil Zatopek, who a few weeks before the Games ladr unt he distance within a couple of seconds of Heino's world figures.

As in the 5,000 metres, I had mapped out a probable schedule, cavisaging that the As in the 5,000 metres, 1 and mappes out a probable schedule, envisaging that the now would be won in about 30 minutes (i.e., a 73 sec.) lap for each of the 25 circuits). In the contract of the 25 circuits, 1 c his characteristic spurts, opening up a gap of ten yards. That was substantially the end, and to the great disappointment of the crowd a lap later Heino retired.

This did not deter Zatopek from running for the rest of the race as if at any moment he expected the Finn to reappear in front of him. I do not know now whether Zatopek realised that Heino had departed. For the last 8 laps, as the Czech proceeded to overhaul and lap runner after runner, the crowd cheered him on with tumultuous applause. With a 66.6 last lap

A sheet of paper begins to grow

A SPRUCE SEEDLING HAS TAKEN ROOT - one of millions in the forests of Newfoundland, Norway and Sweden that will become fine trees and one day give their logs to form pulpwood for Bowaters.

Wood fibre has come to rank among mankind's most useful raw materials-the chief raw material of an industry second only to agriculture in importance. Ingeniously refashioned, it makes paper-it becomes board-virtually becomes wood again without wood's failings. It helps to build houses, factories, ships,

It was because Bowaters foresaw that a vast and versatile industry must grow upon the potentialities of wood fibre that the Bowater Organisation was conceived and formed. By the control of lands and forests, by experiment and research on a vast scale, by the building and installation of giant mills and machines, by incorporating leading firms in many branches of this vital industry, the Bowater Paper Corporation has equipped itself for the task of supplying paper and board on the scale of tomorrow's needs.

Issued by THE BOWATER PAPER CORPORATION LIMITED London

MARATHON

(42,195 m. = 26 miles 385 vds.) OLYMPIC RECORD:-K. Son (Japan), 1936-2 hr. 29 mins, 19.2 secs. 1948 WINNER: -D. Cabrera (Argentina) -2 hrs. 34 mins. 51.6 secs.

By WILLY MEISL

DRANDO PIETRI the Second. That's what I should like to call that very gallant Lieutenant in the Belgian parachute regiment, Etienne Gailly. At the XIV Olympics, in a star-studded field of Marathon veterans, this 21-year-old cross-country runner made an unforgettable debut Like Dorando, he failed to win, but surely never was a Marathon race run and finished with more supreme courage.

Gailly was first man back on the red track in the Wembley Stadium, but under the cruel strain of that spurt over the 25th and 26th miles with only one aim in mind ("I must be first at the Stadium!") he forgot all about the lap which had still to be run in the Stadium itself. He arrived all in," and to this day neither Gailly himself nor anyone who watched him knows how, with waxen face and the tottering shuffle of utter exhaustion, he managed to finish those few hundred metres with a body that had practically ceased to function consciously. Only after crossing the finishing line third did Gailly's unflinching determination allow him to collapse, to be carried off on a stretcher.

Since he finished first and won the race right worthily, it may be unjust to mention Delfo Cabrera only now. This fireman from Buenos Aires never put a foot wrong during the whole race, and arrived at the Stadium full of running. Like the 38-yearold Briton, Tom Richards, third to enter the Stadium, Cabrera was his team's second, or rather third, string. Like Richards, he had been grossly underrated. Richards emulated Cabrera in passing Gailly on the "lap of honour," and did extraordinarily well to finish only 16 seconds behind the Argentinian. This is the closest a British runner ever got to winning an Olympic Marathon. In Berlin, 1936, Ernie Harper was 2 mins, 4 s. behind the Korean, Kitei Son, while in Los Angeles, 1932, Sam Ferris oddly enough, another Argentinian, Juan

Argentina dominated the 1948 Marathon in no uncertain manner, having two men in the first six and all three of their men

among the first ten. The South African policeman, Johannes Coleman, another veteran of 38, came fourth, followed by Eusebio Guinez (Argentina), Luvt (South Africa), Ustling (Sweden), who for a few miles had been third, Systad (Norway), Sensini (Argentina), and Viljo Heino, of Finland, who had never run the of the 44 entries started : thirty of the 41 competitors reached the arena.

Here is a short "log" of the 42km. 195m. (26 miles 385 yds.) over very hard, very hilly roads 2 MILES: Guinez in the lead; closely

behind him in a bunch, Wen Ngau Lou (China), Gailly, the Swedes, the Finns and

D. CABRERA (Argentina)

a few others. Holden running in the middle of the field already spread out over more than a couple of hundred yards. With Holden were the Korean, Yun Chil Choi, Schiesser (Switzerland), and Kiss (Hun-gary), while the Canadians, Cotê and Evans, the Americans, Kelley and Vogel, Koru (Turkey), Ragazos (Greece), and the Italian, Costantino, ran in the rear, the Italian followed by one of his fellow-countrymen on a bicycle. The muscular Manninen (U.S.A) passed me here-I followed the race by ar-as whipper-in: a little later the Irishman, Mulvihill, was in the rear. 6 MILES (ABOUT 10km.): Gailly passed

this mark in 34:34; Lou in 34:45; Josset (France) and Guinez in 34:58; Hietanen, Kurrikala (both Finland), and Ostling (Sweden) 35:08, Hietanen running well within himself at this stage. Choi did this stage in 35:13; Sensini, 35:40; Holden and Cabrera a couple of seconds behind Sensini with Piesse (France) next. A mile further on Hietanen had trouble with his injured right foot and began to limp. After 14km. (about 9 miles) he had to give up. He was, perhaps, on known performance, the best prospect in the field

9† MILES (15km.): Gailly 14 secs. ahead of Lou who, running high on his toes, looked impressive, but not as if he would last long. Forty seconds behind the Chinese came Guinez and Josset, a little farther behind, Ustling and Kurrikala. Choi was seventh; Cabrera eighth, I min. 25 s. behind Gailly, and 20 yards ahead of Luyt, Evans and Sensini

About 12 miles farther on I saw Gailly look at the stop watch he carried with him, checking his speed. 13 MILES (20km.): Gailly, 1:00:20:

13 MILES (200m.): Gally, 1:09:29; Lou, 1:09:53; Guinez, Josset, 1:10:35; Ustling, 1:10:40; Cabrera, 1:10:51; Kurrikala, 1:10:54; Luyt, 1:11:08; Holden and Choi, 1:11:18; Sensini, 1:11:42; followed by Coleman, Heino and Richards, 1:11:47.

Thus Cabrera had gone up to sixth place. Kurrikala, running almost beside him, is the former world champion in the ski Marathon over 50km. (31 miles). 15 MILES (24km.): This might almost be

called the "turning-point." secs, in front of Guinez, was I min, in front of Ostling, whom Cabrera had almost joined uyt and Josset next, with Heino, Choi and Kurrikala running behind them in a bunch Holden making up leeway 50 yards ahead of Richards and Coleman. The tough Swiss champion, Frischknecht, had dropped out.

15 MILES (25km.): Gailly, 1:27:27; Guinez, 1:28:08; Östling, 1:28:36; Cabrera, 1:28:38; Luyt, 1:28:52; Lou, 1:29:03; Heino, 1:20:04; Choi. 1:29:05; Kurrikala, 1:20:10; Holden, 29: 32; Sensini, 1: 30:01; Coleman and Richards, 1:30:11.

After 17 miles (27km.) Holden gave up, having run some miles with a severely blistered left foot. Ostling's step had shortened considerably, Heino was still the finest stylist in the field, running exactly as if he were on the track in a 10,000m. race I was doubtful whether he would finish the course; however, he kept style and pace to the end. Gailly and Guinez, in the lead, were running very strongly indeed.

18 MILES 220 YDS. (30km.): Gailly, 1:47:01; Guinez, 1:47:33; Choi, 1:47:53; Cabrera, 1:47:54; Ostling, 1:48:25; Luyt, 1:48:30; Richards, 1:48:48; Heino, 1:48:49; Sensini, 1:49:25; Kurrikala, 1:49:29; Cole-

man, 1:50:26. A mile-and-a-half farther on Choi had gone into the lead, closely followed by Gailly, while Guinez stuck to his 27 secs. interval behind the leader. Cabrera was holding his fourth place, and Richards, now one

minute behind the Korean, was fifth. 212 MILES (35km.): Chol, 2:06:02; Cabrera, 2:06:30; Gailly, 2:06:33; Guinez, 2:06:37; Richards, 2:06:54. The race was on. It is an axiom among Marathon runners that the race really "starts" after 30km, (about 18 miles). There the decisive phase begins. The tete group had separated itself from the rest, who passed this point in this order-Luvt, 2:08:00; Ustling, 2:08:04; Coleman, 2:08:18; Sensini, 2:08:56; Kurrikala, 2:09:54; Heino, 2:09:57; Systad, 2:11:32; Larsen, 2:11:53; Melin, 2:11:59; Vogel, 2:13:28: Kelley,

After 23 miles (37km.) Cabrera was running 5 secs. in front of Gailly, with Richards third. A hundred vards behind him lay Guinez. Choi, limping, was rapidly falling back, and was soon forced to give up.

241 MILES (39.5KM.): The final three had now emerged clearly from the ruck, Cabrera was leading, 5 secs. ahead of Gailly and 11 secs. ahead of Richards. His lead on the others was as follows: Guinez, 55 secs.; Coleman, 1:40; Luyt, 2:35; Cutling, 3:20; Sensini, 3:40; Systad, 4:45; Kurrikala, 5:30; Larsen, 6 mins.; Heino, 6:10; Melin, 5:40; Vogel, 9:50; Aranciba, 11:40; Coté, 12 mins.; Kyria-kiles Vol. (Engraya). kides, 12:15; Evans, 12:45.

When last I saw the field outside the Stadium, Gailly, though clearly under pressure, was preparing a final attempt. Gathering his last reserves of strength, he took the lead once more. Richards mistakenly thought himself lying fourth and, therefore, concentrated on securing actually third he might have challenged the winner, although Cabrera was running well within himself.

It remains only to be mentioned that a number of competitors said afterwards the London course had been the toughest they had ever experienced. Perhaps the sultry weather and strong wind had also something to do with the comparatively moderate times. The Finns assured me

Not one of the favourites finished among the first ten. Only Coleman, Ustling and Systad won the forward places the experts had thought them capable of, whilst the bearers of such great names as Yun Bok Su, Hietanen, Holden, Vogel, Coté, Costantino, and Kyriakides either did not finish at all. or were far, far behind the winner. This was in full accord with Olympic tradition. Only once (1920) has the Olympic Marathon been won by a favourite. In all the other nine races an outsider, often an entirely unknown runner, has won the premier

"One simply runs, and keeps on running," explained Delfo Cabrera, the victorious fireman from Buenos Aires, as he sat on his bed at Richmond Camp on the evening of his triumph with the same happy smile on his expressive lips as he wore when he

passed the winning post.
"Sure. I am a little tired, but nevertheless I shall have my usual walk to-night, before I go to bed. There is nothing in such a victory," Cabrera continued, "the main thing is to run just a little faster than the other competitors." Cabrera wasn't trying to pull my leg, nor to make a joke. He meant precisely what he said.

'No special training for me, thank you, Of course I run about a dozen miles (20km.) on some days, rather more than three times a week, but that is about all I do in the way of training.

Cabrera, fine-striding, confident

winner, passes Gailly. For 26

miles the plucky Belgian has done

so much ... now he can do so little.

"You think I shall stay in bed to-morrow (Sunday)? Oh no! I shall be getting up at seven as on any other day. It only makes you slow and dull if you stay in bed too

110 METRES HURDLES

(120 vds. | ft.)

PREVIOUS OLYMPIC RECORD :- F. G. Towns (U.S.A.), 1936-

The order of starting for the final was Dixon (U.S.A.), Porter (U.S.A.), Lidman (Sweden)—a finalist in 1936—Triulzi (Argentina), Gardner (Australia) and Scott (U.S.A.). It was plain that the three Americans were in a class by themselves, and from the start there Olympic record time of 13.9 secs., while Scott and Dixon were almost inseparable in time which equalled F. G. Towns's Olympic record of 14.1.

Britain's three representatives, Finlay (appearing in his third Olympiad), Barkway and young Birrell, all succumbed in the first round, Finlay falling after the last hurdle when he was certain to quality. But for this misforume Findlay might have reached his third Olympic final, but no one can suppose that he would have been placed in the first three.

400 METRES HURDLES

W. F. PORTER (U.S.A.)

(437 yds. I ft.) WORLD RECORD :-- G. F. Hardin (U.S.A.), 1934 -- 50.6 secs. OLYMPIC RECORD :- R. B. Cochran (U.S.A.), 1948-51.1 secs. PREVIOUS OLYMPIC RECORD :-G. F. Hardin (U.S.A.), 1932

- 52 secs. In the semi-finals both Larsson (Sweden) and Cochran (U.S.A.) beat the previous In the semi-finait potst Larson (Sweden) and Conran (U.S.A.) beat the previous Clympic record, while Duncan White, of Ceylon, who had had no experience of such high-class competition, did will ordinate to the final. Britain's best representative, H. Whittle, very nearly bent Missoni, of Italy, for third place in the second semi-final, and deserves every credit for his performance—3,4 sects, exactly the same time as Lord Burghley. accomplished in 1928. Artion (France), looked upon as the best European, failed to reach the final, in which the order of starting was Cros (France), Missoni (Italy), Cochran (U.S.A.),

Ault (U.S.A.), White (Ceylon), and Larsson (Sweden). White, as in his preliminary rounds, went off at a fast pace, but by the fifth hurdle Cochran, hurdling in superb form, was ahead. He won by a colossal margin and beat the record which he and Larson had set up the day before by 4/5 secs. This was, perhaps, the most magnificent performance

of the whole Games. W	hite also beat the previous Olympic i	record.

3 F.E.Gordien (U.S.A.) 50.77 (166' 7')
4 I. Ramstad (Norway) 49.21 (161' 5\frac{1}{2}')
5 F. Kilcs (Hungary) 48.21 (158' 2')

Great Britain's representatives did not qualify for the final.

(51.77m.) to Consolini's 163ft. (49.63m.). At his next throw Consolini reached 173ft. 2in.

In the preliminary round the former world record-holder, Consolini, with his first throw

In the competition proper Tosi led at the end of the first round with 169ft. 104in

DECATHLON

WORLD & OLYMPIC RECORD:-G. Morris (U.S.A.), 1936-7,900 pts 1948 WINNER :- R. Mathias (U.S.A.)-7,139 pts.

In Berlin in 1936 the first six competitors exceeded 7,000 points, but in comparing the 1948 results we must record that the conditions on the second day were appalling, and that the competitors did not complete their final efforts until 10.40 p.m. In the circumstances, no praise can be too high for the young 17-year-old American, Mathias.

At the end of the first day, that is, after five events, the positions were as follows: I Kistenmacher (Argentina), 3,897 points; 2 Heinrich (France), 3,880; 3 Mathias (U.S.A.), 3,848; 4 Simmons (U.S.A.), 3,843; 5 Mondschein (U.S.A.), 3,811; 6 Mullins (Australia), 3,717. It was after the seventh event, the discus, in which he threw 144ft. 4/in. (4,4m.) that Mathias took the lead, and he never thereafter lost it. There were far too many competitors for the competition, and the International Federation are likely to provide for a qualifying standard at Helsinki. Great Britain was not represented.

HOP, STEP and JUMP

WORLD & OLYMPIC RECORD: N. Tajima (Japan), 1936 -1948 WINNER: - A. Ahman (Sweden) - 50ft. 6lins. (15.40m.) This was another event in which the standard was appreciably lower

than in Berlin, but, of course, Japan was not among the competitors at Wembley. The winner, Ahman, of Sweden, jumped 50 ft, 6½ ins., an inch or two further than he had ever done before, and had just 14 inches to spare over the Australian, Avery, who also produced his best jump ever. Rebello, of India, whom I looked upon as a

Avery, who also produced us best jump ever. Accesses, or. a linely year, Manual Conference of the produced us the produced of the produced of

Garcia (Portugal), R. J. Beckus (U.S.A.),

By JACK CRUMP (Hon. Manager British Olympics Athletics Team).

THE XIV Olympiad can be said to have placed women's track and field athletics firmly on the Olympic programme. Admittedly, athletics for women had figured previously in the Games, but not until Wembley had the public taken seriously the endeavours of the fair sex in a branch of sport which has on the whole been regarded as predominantly masculine. The magnificent sprinting and hurdling of the Netherlands athlete, Mrs. F. E. Blankers-Koen, is partly responsible for this important change of attitude, whilst the thrilling high jump duel between Miss A. Coachman (U.S.A.) and Britain's Mrs. D. Tyler proved conclusively that the sporting public will watch top class women's athletics with absorbed

In the writer's view, this development is of the highest importance, and assures the beginning of a forward movement in what is at last recognised as a suitable sport for women. Thus, as a direct result of the

Wembley Games, the number of countries these new figures will long remain unbeaten, entering women athletes in the Olympic Games of 1952 will certainly be increased. In due course the Olympic programme seems likely to be extended to include XV Olympiad might not see this development actually effected.

As it is, the 1948 Olympics, with nine events for women, showed an addition of three compared with the 1936 programme, the new events being the 200 metres, the their sportsmanship and general behaviour at Wembley, removed many of the objections opposed their inclusion in the Olympic

In the six events in which Olympic records were already recognised, three new Olympic records were created, viz., in the javelin, the high jump and the 80 metres hurdles. In the last event a new world's record was set up by the winner, the inimitable Mrs. Blankers-Koen, whose time was equalled by the runner-up, Miss M.

since, with the increased competition which the next few years will undoubtedly bring,

In the first women's track event at Wembley-the 100 metres-there were nine isers placed at the top of each heat the athlete they considered most likely to progress, and form worked out fairly well.

Mrs. Blankers-Koen, seeded No. returned the fastest time of 12 secs. Miss equal speed, returning 12.1 secs., but Mrs. W. I. Jordan (Great Britain), regarded as the most serious challenger to the Nethereach returned 12.4 secs.

Three semi-final heats were drawn, the first two in each appearing in the final. Whilst this system was probably the most

Times in the semi-final round were not damp and lifeless, but once again Mrs. Blankers-Koen proved the fastest by winning in 12.1 secs. In the last six were two Iones, who appeared to find more speed as

EASY WINNER

The final was a good race, particularly for the minor placings. Mrs. Blankers-Koen, running faster than ever, was a comparatively easy winner in 11.9 secs., 0.4 sec. slower than Miss H. Stephens's Berlin Olympic time. A photo finish was required before the judges announced the other placings, when Miss Manley (Great Britain) was awarded second place, and Miss fifth and sixth were not announced.

The women's 200 metres, an innovation in the Olympic programme, was divided first two in each heat to contest the semifinal. In this there were two heats of seven runners, an unusual number in a sprint in each semi-final to run in the final,

Mrs, Blankers-Koen (Netherlands) was seeded first and, once again, accepted form by Miss D. Robb (South Africa) with 25.3 secs, Mrs. Blankers-Koen won unhurriedly in 25.5 secs.

The semi-final rounds did produce sur-prises and far better times. Mrs. Blankers-Koen won by fully six vards in the first final through Miss A. Patterson. Britain's Miss N. Walker ran well to secure third place in front of more fancied competitors, Miss J. King (Australia) and Miss C.

The second semi-final was notable for the fact that in a wonderful finish the judges were unable to separate Miss A. Williamson (Great Britain) and Miss S. Strickland (Australia). A photo finish was called for, and this confirmed the result as a dead heat. The time, 24.9 secs., was 0.6 sec, slower than that of the first semi-final Miss D. Robb, of South Africa, was third. outside lane, Miss D. Robb the inside. But the unfavourable draw made no dif-

have been more thrilling. Miss Williamson made a tremendous effort in the final 10 metres to catch Miss Patterson and Miss Strickland, who were themselves engaged in a great duel. Once more the camera was in 25.1 secs., and Miss Patterson third in

SPEED AND GRACE

The 80 metres hurdles provided the finest display of speed, grace and technique ever given by women hurdlers. The complete entry totalled 22 from 13 different countries, two semi-finals.

Almost inevitably, Mrs. Blankers-Koen previous Olympic record by 0.3 sec., and equalled the existing world record of 11.3 secs. The semi-finals did not produce technique quite up to the high standard of Mrs. Blankers-Koen, whose winning time Britain) almost failed to qualify, being placed third after striking two hurdles The six finalists came from six different countries, and the decisive race was as thrilling as the most exacting spectator

Miss Gardner was easily best away, Mrs. Blankers-Koen being much the slowest Miss Gardner led over the first hurdles and hurdled brilliantly all the way, as, in fact, did Miss Strickland. However, Mrs. Blankers-Koen gradually made up the leeway and reached the tape at the same time as Miss Gardner. Once again the judges called for photo finish confirmation rightly got the verdict. Both runners were credited with the same time, II.2 secs. which was 0.4 sec, better than the previous Olympic record, and a new world recordthe only one set up in the Track and Field events of the 1948 Games.

The 4 x 100 metres relay, the fourth and final track event, enabled the Netherlands again the peerless Mrs. Blankers-Koen was occasions it was she who broke the tape. However, this last Dutch win, though

expected, was not easily gained. The Australians had, if anything, the better balanced team and, if victory had gone to the four girls from "down under" no one could have begrudged them their success.

The draw for the first round was a trifle unfortunate for France, since only the first two in the three heats survived for the final. Without criticising the organisers, for whom expediency must always be an important factor, it does seem that when three place medals are concerned, the first three in each heat should go forward. On the other hand, it has to be acknowledged that since women athletes do and did compete in each of the four track events, the cutting out of a semi-final round had much to commend it.

In the first heat the great running of the Canadians was a surprise, with the Australians close runners-up. France, despite her team's fast time of 48 secs., was eliminated. Britain, in rather slow time, and team's good time of 47.6, the fastest of the preliminaries, enabled them to go forward from Heat 3 with Denmark.

The final was exceptionally good. Denmark on the outside held a lead for two stages, but Australia on the inside made up much ground in the 3rd stage by a typical effort from that grand athlete, Miss Strickher usual judgment and determination, but challenge until the very last stride. It was the over Australia, with Canada third, and a rather disappointing Great Britain team fourth. Denmark were two metres back in fifth place. The Austrian team were last. In the women's discus event, which was the first women's event to be decided, the standard was well below that of the previous Games. The competition was a trifle difficult to follow, since other events were being

FRENCH DOUBLE

The final resolved itself into a struggle between Sgrna. Gentile Cordiale, of Italy, and the French pair, Miles. Ostermeyer and Mazeas. The latter showed surprisingly Ostermeyer succeeded in improving on her usual standard, whereas Sgrna, Cordiale did not reach her reputed form. medal with a throw of 41.92m. (137ft. 64ms.) which was 5.71m. below the best Berlin performance.

In contrast to the discus, the women's javelin throwing was at all stages of the Form worked out well, and the powerful Frl. Bauma, of Austria, duly proved the best

The Austrian's best throw of 45.57m (149ft. 6ins.) improved on the Olympic record and was 1.78 m. better than the best effort of the stylish Finnish girl, K. Parabout her performances at home. She took third place without ever being a serious challenger to the winner or the runner-up.

France's great field events exponent, Mile, Micheline Ostermeyer, gained her second Olympic title in the weight putt,

An exceedingly close tussle developed for the minor placings, and only 1.5cm. (just over in.) separated the Italian, Sgrna. Piccinini, from Frl. Schaefer, of Austria, when the competition ended. The fourth and fifth competitors were a matter of only a few cm, behind them. Twelve countries sent representatives, and the standard and the technique were very good throughout the competition, most of the competitors showing signs of having been excellently

Included in the Olympic programme for the first time, the women's long jump provided quite a number of surprises, some of the fancied competitors failing to do nearly as well as expected.

The younger competitors, as, for example, Miss J. Canty, of Australia, found the occasion a little too much for them, although Miss Canty did qualify for the final stages. Miss V. O. Gyarmati, Hungary's 23-yearold first string, won the event with a leap of 5.69m. (18ft. 81in.). An excellent effort—but I would remind you that prior to the Games Miss Gyarmati jumped 5.99m. (19ft. 8in.).

Snra, Simonetto de Portela (Argentina) hurdles and sprints by jumping into second place by a narrow margin. A smaller distance separated the best efforts of Sweden's Fr. Leyman and the Netherlands' Kade-Koudijs who, in the absence of Mrs. Blankers-Koen (the world record holder), was joint favourite for the event.

DRAMATIC CLIMAX

By far the most exciting women's event of the whole Games and, in fact, the most field events was the women's high jump In this, the world record holder, Mrs. fair to all parties to suggest that, even if beaten either of the first pair.

Few of the competitors had much difficulty with the lower heights, and no less than six women from five different countries cleared 1.58 m. (approximately 5ft. 24in.) By raising the bar to 1.61 metres (5ft. 3½in.) the judges thereby eliminated three. survivors were the American girl, Alice Coachman, Britain's Dorothy Tyler, 1.64m. (5ft. 41in.), which the other pair

Coachman and Tyler then went from 1.64m. to 1.66m. (5ft. 52in.), and established a new Olympic record. At 1.68m. (5ft. 6lin.) Miss Coachman, after what might have been an attack of nerves, for she took many minutes before attempting, cleared the bar first time, whereas Mrs. Tyler failed. With an obvious and magnificent summoning-up of all beautiful and the British girl (a mother of the back of the over at the second try.

1.70m. (5ft. 7in.), but neite and succeeded

The U.S.A. girl took of her clearing 1.68m. fatter Tyler, for the second equalling the winning her it Games but losing first place.

Empress Hall, Earl's Court, and Empire Pool, Wembley: August 7-13 Carpenter (Great Britain) was none too

TWO hundred and six competi-

30 bantam-weights, 30 feather-weights,

28 light-weights, 26 welter-weights,

25 middle-weights, 24 light-heavy-

weights, and 17 heavy-weights, took

part in the 1948 Olympic Games

boxing at the Empire Pool, Wembley,

with one day of preliminary bouts at the Empress Hall, Earl's Court. No boxing competition of comparable

size had been attempted anywhere in

the world since the Berlin Olympics

That the stage management of the show proceeded without hitch is a great tribute

to the Olympic authorities, to the staff at

de Boxe Amateur, and to the Amateur

Boxing Association of Great Britain. That

mistakes were made-especially in the

selection of referees and judges-was all

too painfully obvious to both eye and ear.

I will refer later to these less happy aspects

of a venture that, by general consent, made

an important contribution to international

amateur boxing. All I need add before

discussing the eight weights is that the

boxers, winners and losers alike, con-

ducted themselves admirably, and in the

FLY-WEIGHTS .- First name out of the

first man in the ring, first to win an Olympic

final of 1948, and first to mount the cham-

pion's rostrum at Wembley Pool was flyweight P. Perez (Argentina)-a 22-year-old clerk in the Chamber of Deputies in Buenos Aires. Runner-up after a close-fought

final—slowed up, perhaps, by nerves engen-dered by the size of the occasion—was

24-year-old S. Bandinelli (Italy). Ban-

dinelli, a miller from Velletri, near Rome-

a score of the 1948 competitors. No records

are available on the point, but I doubt if

any other Olympics have ever produced so

the most consistently high level of all the eight classes-and, as always with the little

fellows, the man with the punch came out

on top. Perez removed both R. Adolfo (Phillippines) and D. Williams (South

Africa) inside the distance, before out-pointing A. Bollaert (Belgium), F. Maidloch

carefully weighing up Bandinelli's "south-

third. Bandinelli's chances were not en-

hanced by his tendency to use the open

glove-a failing all too common in these

go to S. H. Han (Korea), whose streamline boxing and acceleration won him third

place and were in keeping with the highest fly-weight traditions. Others who caught

the eye were L. Martinez (Spain), the Euro-

pean champion, and Majdloch. H. F.

Of the other fly-weights, top marks must

Czechoslovakia), and Bandinelli. In the

Fly-weight form, I considered, was on

of 1936.

tors, representing 39 nations

and made up of 26 fly-weights,

fortunate, I thought, to lose the decision to BANTAM-WEIGHTS .- Bantam-weights, as a class, scarcely reached the level of form Csik (Hungary), the runner-up, G. R. head and shoulders above their contem-

Csik, possibly a shade less aggressive than title. His first series opponent, M. F.

GEORGE WHITING

Nascimento (Brazil), threw his chance away and was disqualified; later, Carruthers (Australia) withdrew with an eye injury to give Csik a walk-over into the semi-final. The new champion's other successes were scored against S. R. Saenz the close-fought final, Zuddas.

W. Lenihan (Eire) boxed well until he ran into Zuddas; so did Venegas; the tall A. V. Domenech (Spain); and V. Toweel (South Africa). Toweel, in the eyes of many experienced onlookers, was unfortunate to have been adjudged the loser against A. Pares (Argentina),

FEATHER-WEIGHTS .- This class-marked by a regrettable demonstration after the defeat of B. Alves (Uruguay) by E. Johnson have to share the history of this event with his "southpaw" co-finalist, D. G. Shepherd (South Africa), a 22-year-old wood machinist from Johannesburg whose rough-weather passage to the final put him almost in the

Dorando" class. Shepherd boxed five bouts, in four of which his right eye was badly cut and subsequently stitched and re-stitched. up puncher—and these Olympics gave us dozens. However, in Shepherd's case, fortune certainly favoured the brave. The verdicts he received over Johnson and F. Nunez (Argentina) were open to hot

debate-and certainly got it ! Formenti, the new champion, began shakily but later made excellent use of the amateurs. His "victims," all on points. were B. Farkas (Hungary), K. Martin (Eire), A. Savoie (Canada), A. Antkiewicz (Poland) and, in the final, Shepherd. Nunez, Antkiewicz, and Johnson all boxed well in their widely varied styles. LIGHT-WEIGHTS.—By winning this class,

clerk, brought further honours to a wellknown boxing family in the Transvaal. Boxing in strictly "traditional" style, and without frills or fancy touches. Drever began his Olympic conquest with a bye, and subsequently beat E. C. Porto (Philipmark) and J. Vissers (Belgium).

Vissers fulfilled much of the high promise championships in Dublin in 1947, but seemed fortunate to receive the decision in the semi-final against W. Smith (U.S.A.). Vissers shaped confidently in the final from a left clip to the chin that put him

down in the second round. Wad, a none too robust-looking Dane,

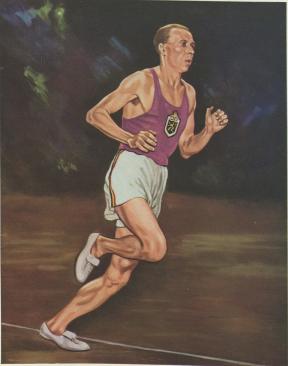

looked to be in no trouble at any stage of the competition. This highly desirable state of affairs was attributable to the fact that he was always set for a punch, never caught on his heels, and made best possible A. C. Diaz (Spain), disqualified; A. D'Ottavio (Italy); and, in the final, the well-built, fast-moving H. Herring (U.S.A.).
Torma, Herring, D'Ottavio and B. distinguished company, M. B. Shacklady (Great Britain) fought successfully in tra-ditional "Olympic" style until he was

MIDDLE-WEIGHTS .- This category provided some of the hardest bouts of the most hotly disputed decisions. The winner was L. Papp (Hungary), a "southnew His stance, and his vigorous two-handed punching gave him a flying start with knock-out victories over V. A. Resko (Fin-land), J. Welter (Luxemburg), and A. Gavignac (Belgium)—a "treble" he fol-lowed up with points decisions over I. Fontana (Italy), and J. A. Wright (Great

It was in the other half of the middleweight draw, however, that the really tough engagements took place. Wright-a 19year-old sailor with only a few months remarkable performance to get through to H. Schneider (Switzerland), H. Garcia (Argentina), J. Schubart (Holland), and M. McKeon (Eire). With a tightening up

1,000 METRES SPRINT: It was quite obvious from a study of the preliminary heats that the final was going old Turin student, and Great Britain's

by W. I. MILLS

Reginald Harris, a 28-year-old company director from Manchester, and reigning world sprint champion. What was not so obvious was the margin by which Ghella was to beat Harris. A week

before the race the forecast was 100 per with his national federation, the National Cyclists' Union. For disobeying training orders he was dropped from the team. Then, after second thoughts, he was reinstated. Storm centre of a furious Press campaign,

some for, some against him, Harris was by no means in the right mood to contest an important event when he lined up against Ghella for the first of the three matches that

In the first match, after a slow start, Harris allowed Ghella to catch him napping. The Italian slipped through on the inside. with 350 m. to go, and opened up a five lengths lead. Harris responded, but at the 200 m. mark had still only just made contact, and was forced to ride high and wide all round the final banking. Realising that, with the extra distance to cover round a half-hearted challenge, and, coming into by two lengths, Harris did not even try a last-minute challenge, and the Italian ran

out the winner, not unduly extended (as

was proved by his last 200 m. time of 12.2 secs.) by two lengths.

In the second match, Harris took the initiative at 350 m, to go. He jumped from the rear position, attacking Ghella on the outside. But Ghella matched his effort, and Harris, finding himself unable to attacked again, and again Ghella withstood him. By this time the pair were at the end to go. Harris made a third and final effort to get by, and again Ghella held him.

The two swept into the final banking, Ghella leading slightly, with Harris outside and slightly behind—the worst possible position at this stage in the race, for he was receiving all the slipstream from the rider being higher up the curve.

Harris lost ground all round the banking and as the two came into the home straight his final effort, and drew ahead. Harris, realising that he had lost, for good and all, his chance of an Olympic title, eased and made no effort on the final run-in, letting time of 12 secs. With two straight wins, Ghella was the Olympic champion, and no third match was necessary.

2,000 METRES TANDEM. The 2,000 m. tandem sprint had the strangest ending of any Olympic event. Owing to various delays in the evening's programme, the third and final match between Italy and Great Britain was run off in almost complete darkness. The earlier rounds had produced no surprises and, once again, it was an "obvious" final between R. Harris and A. Bannister (Great Britain)

and F. Terruzzi and R. Perona (Italy). The British won the first of the three final matches, attacking from the front with nearly a lap to go, and holding the lead to the end. In the second match, the Italians forced a lead at half a lap to go, and with the advantage of the inside position, ran out winners. After a long delay, and in the fast deepening dusk, the two pairs lined up for the decider.

The first 1,500 m. were taken at a steady pace, and at the bell, with one lap to go, the Italians were leading, and moving fast Harris-Bannister then made a great effort down the back straight and into the final banking. Then the Italians, despite the handicap of the longer ride on the outside drew level coming into the home straight and, with a final desperate effort, snatched the lead and the Olympic title, on the very line itself, winning by only six inches.

1,000 METRES TIME TRIAL. Heavy and damp weather conditions ruled out all possibilities of fast times in the rider returning a time much below his previous best abroad, or in training on the just how slow was the going in the Olympic Im. 14.5 secs., and T. Godwin, Great Britain, 1m 15 secs.

4,000 METRES TEAM PURSUIT. The four nations to qualify for the semifinal of the 4,000 m. team pursuit were Italy, France, Great Britain and Uruguay. The draw put France against Great Britain, with France winning, in what was to be the

fastest time of the whole series, 4m. 54.4 secs., against the British 4m. 59.1 secs. Italy beat Uruguay with sm. o.s sees as against 5m. 6.3 secs., and so the final for 1st and 2nd places was between France and

Italy, with Great Britain racing Uruguay to decide third place.

The Italy-France final found both teams were slightly slower. The four French riders maintained good team formation. and finished winners in 4m. 57.8 secs., but decisively beaten with their 5m. 36.7 secs. The British team, on the other hand, acrually improved in their 3rd place final against Uruguay, returning 4m. 55.8 secs., so that the final result shows 1, France, 4m 57.8 secs; 2, Italy, 5m. 36.7 secs.; 3, Great Britain, 4m. 55.8 secs-the time of the third team being faster than either the winners' or the runners'-up. ROAD BACE.

The Olympic road race, over 120 miles Beyaert (France) in 5h. 18m. 12.6 secs., beating G. P. Voorting (Netherlands) The course consisted of 17 laps of a circuit

round Windsor Great Park, and the narrow lanes with their loose surface were by no means ideal for an Olympic event. Punctures played a decisive part in the race, putting many fancied riders out of action. One rider alone sustained eight punctures, while it is estimated that a total of no less than 107 punctures were reported.

In the early part of the race, G. P. Voorting and H. Faanhof (Netherlands), and Nils Johansson (Sweden) got away to a lead on the field, at one time being four minutes the other two eased, allowing the field to

Towards the closing stages, only eight men remained in the leading group (101 riders started the race) followed by a few stragglers. At one lap to go, L. Dela-thouwer (Belgium) and G. W. Thomas age. These two were caught a few miles later, and the eight men were still together

Thomas (Great Britain) attacked on the Voorting (Netherlands) was first at the summit. Then Beysert (France) sprinted by, taking an eight lengths lead. Nobody mine second place. Twenty-eight riders in all completed

the course.

CYCLING RESULTS DETAIL IN

1,000 M. SPRINT By a decision of the commissaires of the international Cycling Union, the distance of the race was reduced from 1,000 m. (1,093 yards) to an exact two laps of the track, i.e., 920 m.

a very good, and usually the steadiest, side wins a big cup competition. But rarely does the best eleven carry it off. The Olympic football tournament was one of the rare exceptions. There is hardly any doubt that the two strongest national sides met in the final and that the best team won through. This was an extremely happy ending to a rather muddled soccer story.

The Danes, too, were fully entitled to their bronze medals, though, naturally, a few other nations might have reached the semi-finals in their and Great Britain's place, the Egyptians in extra time in one of the

Sweden fielded a well-balanced side, in built up of eleven parts which worked in

The Swedes' main strength lay in attack. Never before, and never since 1924 when they won fourth place at the Paris Olympic Games, has Sweden had a side of the calibre Carlsson. What the two wingers (Rosén is really a right-half, and Liedholm an insideright) lacked in directness and speed they snade up in intelligence and precision.

Throughout their football history the Swedish national team have always been

ANY decades of football experience have shown that only great game in the initial stages. Throughout the Olympic tournament-with the one exception of the semi-final against the Danes -the Swedes surprised their opponents by getting into top gear from the first whistle. In the "shadow final," as many experts called the first round encounter between

Austria and Sweden, the bustling centre-forward, Gunnar Nordahl

the Viennese themselves. I would describe their game as "standing soccer." They overdo the useful back-pass. Even with one or two players in promising forward positions, the ball was constantly passed back and the nearer they came to the opponent's goal, the more they elaborated utterly exasperating, the more so as some of their players lack the discipline and restraint which is indispensable in sport, above all in international competition. They tialities in a sterile way.

The goalkeeper, Sostaric, had to risk of positional lapses of the defence. He was hurt in the procedure, Lovric taking his place. Of the three defenders, only the centre-back, Jovanovic, was of international self control was as great as is his football craft, Z. Cajkovski would rank among the world's best wing-halves. All the forwards lack of shooting power, and their reluctance Mitic and Bobek (he played centre-forward in the final), impressed me most.

Like the Swedes (George Raynor), the Egyptians (Eric Keen), and others, the Danes, too, were British trained (Reg. Mountford). Whilst the Swedes have added many Central-European spices to

The Dutch themselves said they could hardly recognise the British side which had been easily beaten by a weaker Dutch eleven only a couple of months earlier. The British had improved enormously. It proved conclusively that, with proper organisation and planning, British amateur football could still produce great teams as it did in the past. 'Matt Busby's coaching

had certainly helped the side enormously, Many of the other teams in the Olympic tournament would be worth a thorough meet the winners right at the start. The Italians fielded a splendid eleven who combined attractive short passing with punch and accuracy. Had they not run into a Danish side at the top of its form they would have gone far. The Egyptians produced football of the highest order, but Denmark was the more solid team.

Nevertheless, only luck and an extraordinary display by their goalkeeper, Nielsen, allowed the Danes to scrape through 3-I after extra time.

The Turks have learned a lot lately, but side of the game, and it was only just that two of their men received marching orders in the battle with the Yugoslavs, who won 3-I. The French amateurs and those from Eire did not sparkle; the Dutch seemed unable to produce their best form; while Luxemburg taught the Yugoslavs, a lesson when, in the first round, they were leading by the odd goal at half-time. Later, two Luxemburgers had to leave the field and Yugoslavia won 6-1.

China played attractively, but did not carry enough weight to cope with the physically powerful Turks. The Koreans, Mexicans and Afghans had come to see and to learn.

There remains the Indian side, who played really delightful football. Whilst the Turks put too much "body" in their game, the Indians go to the other extreme by attempting to play a sort of disembodied soccer.

Most of them play barefoot, but they have their ankles heavily bandaged, and the big toes protected by plaster. They proved excellent ball players, but could not score, I think that they would have defeated France. The captain and centre-half of the side, the medical student, Aao, does not play as third back, but follows his forwards.

THE SEMI-FINALS Sweden 4 Denmark 2 (4-1) Sweden: Lindberg; Leander, Erik Nilsson; Rosengren, B. Nordahl, S. Andersson; Rosén, Gren, G. Nordahl, H. Carlsson,

DENMARK: Eigil Nielsen; Viggo Jensen, Övergaard; Piilmark, Örnvold, Ivan Jensen; Plöger, K. A. Hansen, Praest, John Hansen, Referee: S. Boardman (Great Britain).

Linesmen: R. J. Leafe (Great Britain), M. Matancic (Yugoslavia). The Danes dominated the first half-hour

of this game, and took the lead through the bar. In the 17th minute Sweden equalised through one of the most original goals I have ever seen. The Danish goal was empty-except for Gunnar Nordahl, the Swedish centre-forward, who had taken refuge there to avoid being given offside. ball over the goal-line, Nordahl caught it

like a goalkeeper, only after it had crossed ahead, 4-1. After the interval a shot from John Hansen found its mark, and lowered the margin to 4-2.

Yugoslavia 3 Gt. Britain 1 (2-1) YUGOSLAVIA: Sostaric; Brozovic, Stankovic; Z. Cajkovski, Jovanovic, Atanakovic; Mihajlovic, Mitic, Völfl, Bobek, Z. Cajkovski. GT. BRITAIN: McAlinden; Neale, McColl; McBain, Lee, Fright: Donovan, Hardisty, Referee: Van der Meer (Netherlands). Linesmen: J. Best (U.S.A.), I. Eklind

In the early stages the British forwards work cut out to keep his goal intact. A lucky goal by Bobek in the 19th minute gave Yugoslavia the lead, but, one minute later, with a hard opportunist shot, Donovan made it 1-1. Völfl scored Yugoslavia's

PLAY-OFF FOR THIRD PLACE Denmark 5 Gt. Britain 3 (3-2) DENMARK: Nielsen; Jansen, Övergaard; Piilmark, Örnvold, Jensen; Plöger, Lund-

GT. BRITAIN: Simpson; Neale, Carmichael; Hardisty, Lee, Fright; Boyd, Aitkin, McIlvenny, Rawlings, Amor. Referee: Van der Meer (Netherlands). Linesmen: Youssuf Mohamed (Egypt). D. Caparni (Italy).

Great Britain and Denmark had been opponents in two previous Olympic Finals, 1008 and 1012, and Britain won both. In 1948 the old rivals met in the match for third place, and the Danes came out on top. On the soft, slippery ground, in pouring rain, the game was not of the highest class and both goalkeepers committed serious

The British side had been changed in six places, but there was hardly any improvement on the performance shown in the semi-final. McIlvenny scored after only four minutes. Praest equalised in the 12th minute, and Hansen made it 2-1. Helped by Hardisty, McIlvenny equalised, but Jensen scored direct from a free-kick. After the change-over, Praest scored a fine goal from outside-left and, after Amor had replied from the penalty spot, Praest produced a fifth goal, this time heading through from outside-right.

FINAL

Sweden 3 (Yugoslavia 1 (1 - 1) SWEDEN: Lindberg; Knut Nordahl, Nilsson; Rosengren, Bertil Nordahl, Andersson

Yugoslavia: Lovric; Brozovic, Stankovic; Z. Cajkovski, Jovanovic, Atanakovic; Cimermancic, Mitic, Bobek, Z. Cajkovski, Vukac.

Referee : W. Ling (Gt. Britain) . Linesmen

Sweden's forwards, above all Carlsson,

missed sitters in the early stages. The Swedes produced some delightful movements, and the Yugoslavs soon followed suit. In the 23rd minute the ball travelled to Gren, who put it in the net. After 40 minutes, Bobek scored for Yugoslavia, The whistle went while the Yugoslavs were attacking, and the Swedes seemed to be after having had command of the game for After the interval Bobek was injured by

Bertil Nordahl and the game got rather out of hand. A masterly move by Gunnar Nordahl brought the decisive goal in the third minute.

sprint, passing the ball twice and receiving it again from Carlsson, Nordahl forced his way through like a tank to make it 2-1.

The Yugoslavsrallied well, but were incapable of scoring. the Yugoslav goal, although Gren scored from the penalty spot - 3-1.

Gunnar Gren, of

FOOTBALL TOURNAMENT Prelim. Round 2nd Round Semi-Finals Sweden: Sweden: 3 Denmark: 5 SWEDEN Luxemburg: 6 Luxemburg: 1 Yugoslavia: 3 Yugoslavla : 3) Yugoslavia 2 France : Play-off for third place : Denmark : 5 Gt. Britain : 3.

1,500 m. freestyle-the young American athlete sounded the finale for the greatest swimming tourney in Olympic history.

Never a session passed without a new Olympic record being established. New Olympic figures were set up in eight events, and equalled in another out of a total of eleven. Frequently records went by the board in heats, semi-finals and finals. But able advance competitive swimming has made since the Berlin Olympiad came in the final of the women's 4 × 100 m. free-style relay. Five teams, U.S.A., Denmark, the Netherlands, Great Britain, and Sweden -incidentally the latter were disqualifiedall beat the Olympic record of 4 mins. 36 secs., standing to the credit of the Netherlands since the Berlin Games. It is no secret that the U.S.A. sequence

of eight successes came as a surprise even to the most optimistic American. The knowledgeable ones were quietly confident of four victories only-the 1,500 m, freestyle, 100 m. backstroke, 200 m. breast stroke, and the 4 × 200 m. freestyle relay. But the American lucky break came when Frenchman, Alex Jany, red-hot favourite for the 100 and 400 m. freestyle, was completely eclipsed, and could only qualify for the final of both events in the rather undignified position of fastest loser,

When Jany won the first heat of the 100 m. freestyle comfortably in 58.1 secs., the Frenchman made a promising start in his attempt to win two titles, the sprint and middle distance crowns. But the shape of things to come emerged when the U.S. sprint champion, Walter Ris, flared through the fifth heat to win by 5 yards in 58.4 secs. Geza Kadas (Hungary) had something in hand when he won his test in 58.4 secs., and the same comment applied to the other Americans, Keith Carter and Alan Ford.

Times improved generally in the semithe two fastest losers, qualified for the final. In the first semi-final, Carter sprang a big surprise when he led Jany from pistol shot to the finish, with the new Hungarian discovery, Szillard, third. Apparently, Carter swam to orders in the hope that the temperamental Frenchman would become unbalanced when he found he was led. And that was exactly what happened. Ris, who took the second heat by a foot from his

SWIMMING Empire Pool. Wembley: July 30-August 7

countryman. Ford, swam a confident race, When the eight finalists lined up on the starting platform the majority showed signs of the strain. Not so Ris! He took up position, a picture of quiet confidence Iany was the first to make his effortmaybe a little too early-and was head and shoulders in front at 60 m. But 5 secs later Ford, travelling on a beautifully balanced stroke, was in front, and stayed there until Ris made his final effort 10 m. from

W. I. HOWCROFT

home to catch Ford almost on the post and Meanwhile, Kadas, swimming on an outside lane, had got his left arm entangled in the rope, otherwise he might have taken second place. It was an epic final, the greatest of all time, with five men finishing

within one second of each other. Jimmy McLane's success in the first heat of the 400 m. freestyle, when he coasted through comfortably to set up a new Olympic record of 4 mins. 42.2 secs. prompted the opinion that the final was a gift for the 17-year-old American boy, especially as Jany, who turned out in the third heat, went down to unexpected defeat by the British champion, Jack Hale.

Leading throughout the Frenchman appeared to be travelling exceptionally well when he turned for the last length, 10 m. in front of Hale. Then to everyone's surprise Jany could not respond to Hale's last-minute dash when Hale got up to win 53.3 secs. In the other heats, Bill Smith (U.S.A.), and John Marshall (Australia), along with Kadas, appeared to be content

Contrary to expectations, Smith jumped into the lead from the start in the final, followed by Kadas, Mitro, Marshall, and Lane. Passing the 200 m. mark Smith, moving with a remarkably powerful stroke, was clear away from the field, at least 5 m. in front of McLane, closely followed by the Australian boy, and the two Hunparians. Down the last length Smith held on grimly to spring a big surprise with the favourite, McLane, second, well clear of Marshall. Without slighting the winner, it may be said that McLane swam a badly judged race. He was 7 secs, below his normal time when he turned at half distance

After the heats of the 1,500 m. had been decided there was little to choose between McLane, Stipetic (Yugoslavia), Csordas (Hungary), Marshall, and Mitro. The three British representatives put up a good showing. Hale with 20 mins. 31.9 secs., and the two 15-year-old boys, Donald Rland and Jack Wardrop, 20 mins. 13.9 secs., and 20 mins. 43 secs. respectively, are times which indicate a revival of British distance

With the two favourites, Marshall and McLane, in separate semi-finals the two races resulted largely in qualifying processions. From the pistol shot at the start of the final it was evident that McLane had learnt his lesson in the 400 m. final. From the first stroke he was always level with the leaders, Mitro and Csordas, with Marshall taking matters easily over the first Just before the 400 m. mark, Marshall behind McLane with Mitro close up in third place. There was no change until the 1,000 m. mark, when Marshall was on level terms with McLane.

The two boys measured strokes side by side for a 100 m., then McLane applied more power to his arm pull, and drew away into a comfortable lead, to win by 15 m. fresh and strong, whereas Marshall, although not exhausted, was definitely tired when he completed the course 15 m. in front of

We had not long to wait for the Olympic

W SMITH

breast stroke. Joe Verdeur (U.S.A.) did the trick in the second heat when he came through in 2 mins, 40 secs,, as against the figures of 2 mins. 42.5 secs. set up by Hamuro at Berlin. Without doubt the loose-shouldered American made a sensational European debut. And there was a

in the slow time of 2 mins. 49.4 secs. But in the first semi-final we saw what was probably the closest race in the eight-day programme. Kandill (Egypt), Jordan (Brazil), Sohl (U.S.A.) and J. G. Davies (Australia) were less than a yard apart when disappointment of the British section of the big crowd present, Roy Romain failed to qualify for the final when he finished fifth in 2 mins. 49.6 secs.

Flaring away from the start, Verdeur was never headed in the final, which he won in mins. 39 3 secs., a new Olympic record. from Carter, whose last length dash took him into second place in 2 mins. 40.2 secs., 3 m. in front of the third U.S A. man, Sohl. Incidentally, seven of the eight finalists

swam the butterfly stroke, the exception being Bonte (Netherland), who brokes last with the orthodox bear and South African, Jack wild saver ald engineering apprentice, in the first heat of the when he won easily in the cr 68 5 secs., but failed to so in the next round. Was

EVER SEEN A GOAL LIKE THIS ? Possibly without parallel in Soccer annals was the goal scored by Carlsson, Swedish inside-left, against Denmark in an Olympic semi-final. Carlsson headed the ball straight and true into the Danish net. There it was caught—by his famous team-mate, centre-forward Gunnar Nordahl ! Seconds before, Nordahl, with lightning presence of mind, leapt into the empty goal to avoid being off-side, Nielsen, the Danish keeper, having run out to meet the attack. Nielsen is lying on the ground beside his backs. Quite properly, Carisson's goal was allowed. Picture by "Expressen," Stockholm. A LTHOUGH there was a football

Rolex break a 40-year rule to publish this amazing letter

RECENTLY a letter arrived at the Rolex Office in Paris concerning the astonishing adventure of a Rolex Oyster Perpetual wrist-chronometer. The letter (shown in translation above) relates a story so unusual that Rolex are breaking a 40-yearold rule to publish the text in full.

This story shows that a Rolex watch can survive a test immeasurably more severe than any that could ever be devised in a

in his movements when he came through in the next heat. Georges Vallerey, stocky powerful European champion, just fulfilled expectations when he came through the

After the two semi-finals had been completed the backstroke crown looked to be a good thing for Stack but, as the race went, Stack had only o. 1 secs, in hand from Cowell There was a gasp of astonishment when the names of the U.S.A. side for the 4 × 200 m. freestyle relay heat was announced that they called on four reserves to swim in the preliminary heat. Hungary, who won

the heat, put up a much better performance than was expected when they finished two yards in front of the U.S.A. in 8 mins. 53.6 secs .- figures which were only 2.1 secs. outside the Olympic record. Naturally, in the final, the Americans left

nothing to chance. It was an all-star quartet-Ris, the winner of the Olympic sprint, McLane, winner of the 1,500 m., Smith, 400 m. title holder, and Wolf. But this all-star constellation had to fight every metre of the way to defeat the Hungarians, who certainly rose to the occasion. The U.S. won in 8 mins. 46 secs., well inside the Olympic and world's record of 8 mins. 51.5 secs., set up by Japan at Berlin in 1936. Hungary, too, were inside the record with their 8 mins. 48.4 secs.

With the speediest sprinters in the Netherlands, Denmark, Sweden, and the U.S.A. drawn in separate heats the women's 100 m. freestyle preliminaries were not unduly exciting, except in the fourth heat,

when tall Californian Ann Curtis just pipped the Dane, Greta Andersen, by 0.2 secs. in 66.9 secs. Relatively, the best performance in the heats came when 14-year-old Australian, Marjorie McQuade, qualified for the semi-final in 68.5 secs.—an amazing performance for a schoolgirl.

Greta Andersen, the tall, lithe, 20-year-old Dane with an easy-flowing stroke, showed her real merit when she took the first semirecord, with another Dane, European champion, Mrs. Fritze Carstensen (nec Nathansen), second in 67.5 secs. In the opposite semi-final, Ann Curtis was by no means all out when she took first place in

With seven of the eight finalists fighting for until the turn, when Mrs. Carstensen held a I m. lead. Then Miss Andersen pulled to Curtis challenged strongly, but failed to catch Miss Andersen, who won her first Olympic crown in 66.3 secs. event, the women's 4 × 100 m, relay, will

The only real excitement in the heats of the women's 400 m. freestyle was generated when Britain's hope, little Cathie Gibson, sailed in a comfortable winner in 5 mins. 26.9 secs., in the second heat. As usual, Cathie did not make her effort until the last 100 m. when she tore away from fifth to first place. Her time, too, was a stimulant, as it proved beyond all question that Cathie had made a successful recovery from her throat operation. Pat Neilsen, Britain's third string, was lucky to go forsecs, swim when she was placed third in the last heat, whereas Margaret Wellington

in her heat in 5 mins. 40 secs. There was, however, one regrettable incident when Greta Andersen collapsed at 200 metres in her heat, and had to be taken to the dressing room for medical

From memory, I doubt whether any other Olympic final has produced more records than the women's 400 m, at Wem-Rie Mastenbroek's Olympic record of mins, 26.4 secs. The winner, Miss Curtis, once again demonstrated her keen racing brain. She allowed the Dane, Karen Harup, the Ostend girl, Fernande Caroen, and Brenda Helser, to make the pace until turning for the last 100 m, when the American girl glided away to win by place, a foot in front of Cathie Gibson. At half distance Miss Gibson was lying

seventh in an apparently hopeless position, but when she speeded up for the last 100 m. she sailed through the field. My personal guess is that, if Cathie had tried to hold the eaders from the start, she might have won. By way of a change there was some grand racing in the heats of the women's 200 m. breast stroke. Australian-born Nancy Lyons, and the powerful Budapest girl, Eva Novak, had a great fight in the first heat which Nancy won by less than six inches in 3 mins, 2.9 secs., just outside the Olympic record. But the record went in 1.2 secs., and the favourite, Nel Van Vliet (Netherlands), took a big chunk off Miss Szekely's record by winning the last heat

in 2 mins. 57.4 secs After the semi-finals had been decided the final appeared to lie between Miss Van Vliet and Miss Novak, who had finished first and second in 2 mins. 57 secs., and 2 mins. 58 secs. respectively. But bathside experts had ignored the chance of the Australian challenger, Nancy Lyons. The two Europeans, Miss Van Vliet and Miss Novak had a battle royal for the first three lengths, then Miss Lyons speeded up her However, despite a desperate finish, the

Van Vliet, who won by a foot. In what was supposed to be the most open event on the programme, the 100 m. backstroke, the winner, Karen Harun, gave a splendid exhibition of the art of waiting in front. A beautiful stylist, Miss Harup was never led in the heat, semi-final, or final. Yet she had sufficient reserve in hand to finish strongly and set up an Olympic record of 75.6 secs, in the heat, 75.5 secs. in the semi-final, and 74.4 secs, in the final. During a week of pulsating thrills, one

live in one's memory when the majority of the other contests are forgotten. When Denmark took the first heat in

4 mins. 33.5 secs. from U.S.A. (4 mins. 34.1 secs.) both teams were nicely inside through the next heat to win in 4 mins

Although they had set up the fastest time in the heats, the Netherlands were never in front in the final. The Danes appeared to be inspired. Their first three legs, Rissie, Harup, and Andersen tore girl, Hanny Termeulin, with Ann Curtis (U.S.A.) and Cathie Gibson (Gt. Britain) practically level for third place at least three metres behind Denmark. Away went Carstensen, with Termeulen pounding, threshing behind her in a cataract of foam wenty metres from the finish Denmark looked a certainty to take the relay crown U.S.A. team? Well, perhaps they would make third place.

But Curtis, travelling straight and true in Lane 6, came into the picture. Only 10 m. from the finishing pontoon the Cali-fornian swimmer was a 100 to 1 chance, but she got up to win an impossible race by and Great Britain. It was an epic in which

all four teams beat the Olympic record.

When the excitement subsided, there was one general query. "What time did she do?" It appeared that the or more split-second watches on the American team, and after discussion it was admitted that Miss Curtis had swum her 100 m. leg in 64.4 secs.—0.2 secs. faster than Willy den Ouden's world record of 64.6 secs.

Of course, Miss Curtis's figures could not be recognised, as they were set up in a relay but, unofficially, Miss Curtis went back across the Atlantic, credited with being

It will be noticed that in the O Olympic Swimming resules, occurs that a swimmer placeturns a faster time than one -c.g., H. M. Yate, in heat 2 ct 100 m. Back-Stroke semi-fic 100 m. Back-Stroke semiliar.
18.6s. when placed fourth the line induced whereas H. A. M. Van der with a slower time—im. 18.65. The line with a slower time—im. 18.65. The line with a slower time is that that the judges of the line with the l keepers may return.

TALY'S unchecked success in the 18 nations entry for the 1948 Olympic water polo tournament in London was no surprise to those who had watched the Italians win the European water polo championship on the Riviera in 1947. Nevertheless, Italy had to fight hard-those are the right words-through every round. And to add interest to the competition there were only odd goals between Hungary. Netherlands, Belgium, Sweden and France. Two new contestants came into the final ranking when Egypt and Spain were placed seventh and eighth.

He, too, had to win six contests before being acclaimed victor, winning also five by direct falls, and one points verdict against S. Leppanen (Finland), who gave him a hard tussle before losing the judges' award. G. Friindfors (Sweden) put up a fine show to take second place, winning four bouts and losing only to Atik. ___bv ___

GEO. MACKENZIE

(Secretary, British Amateur Wrestling

Association) In the welter-weight we saw the terrific y Dogu, of Turkey, carry off the premier

European championships. What a powerful wrestler this Turkish champion is. He seems to have the strength of two or three men, and the determination to get the job over in the shortest possible time. end he began by handing out four falls in succession, scoring victories over India,

Dogu went on to defeat the Australian, R. Garrard, in the final bout with another wrestling. Garrard, who took second place, must be classed as a first-rate performer, for he was at the Berlin Olympiad of 1936, London, which he won. He won four bouts, losing only on a judge's disagreement to L. Merrill (U.S.A.), and to Dogu, the

In the middle-weight class it was the turn of the U.S.A., who carried off this event through G. Brand, a fine exponent of all-round wrestling. He had a somewhat softer path (if there are any softer paths in But his gaining of a fall over the Turk, A. Candemir, was a very fine achievement.

The light-heavy-weight division also brought success for the U.S.A., H. Wittenberg, the New York policeman, taking first place after a great struggle. His final bout with the clever Swiss wrestler, F. Stoeckli, was a contest that will live long in the memory of those who saw it. To win this title, Wittenberg had to take the judges disagreed, and this is about a fair return of the bout. The pity was that one by the draw, but even so, he had to win five

The heavy-weights brought victory back again to Europe. This time Hungary

supplied the winner in G. Bobis, a somewhat seasoned performer in European rings, His path was not so hard as in many of the other weights, having to win only four

bouts to get first place. But his sterling victories over the European champion, B. Antonsson, of Sweden, and the huge J. Ruzicka, of Czechoslovakia, stamp him as had to be content with second place. Next came the Greco-Roman events

This style, which forbids the use of the legs, is very popular in most European countries, except Great Britain and the South American continent.

In the Greco-Roman the path to victory was if anything a little less severe : only in the middle and light-heavy-weight classes was it necessary for the winners to take part in six contests. But we must remember that the contests in this style last five minutes longer than in the Free style, i.e. twenty minutes

Italy scored the first victory in the flywith the bantam-weight, K. Petersen taking the first prize with five victories. His win over the brilliant Egyptian, M. Hassen Alv. was a delight to those who understand the

It was now Turkey's turn again, in the feather-weight class, M. Oktav taking first Anderberg (Sweden), the European

The light-weight division saw the beginthis weight, with A. Eriksen, of Norway, coming second.

Five times the winner had to take the Hungarian, K. Ferencz, being a particularly The welter-weight title went to E. Ander-Holland, Denmark, Italy, France and Hungary-again an outstanding perform-

ance in an Olympic event. The middle-weight competition saw a grand wrestler in action in R. Grönberg Olympic first prize. Well and truly did he it, winning over Egypt, Norway Finland, Hungary, Belgium, with a final terrific bout with M. Tayfur (Turkey) whom he defeated on points, the Turk taking second

The light-heavy-weight prize also went to Sweden. Here we had K. Nilsson taking hard to defeat K. Grondahl (Finland), who

land, and Italy in the first or place going to T. Nilsson St.

WEIGHT-LIFTING

TUDGING from the phenomenal results, weight-lifting has a reasonable claim to have progressed further than any other Olympic sport. At the London Games of 1948 all existing Olympic records were broken, some by a considerable margin, and seven world records exceeded. Originally, thirty-five nations submitted entries, but eventually 120 competitors from 30 countries took part.

Hot favourite for the bantam-weight class was the "Miniature Hercules" from U.S.A., Joe de Pietro. He secured a At this stage he was followed by Greenhalgh behind in the faster lifts. However, the other British lifter, Julian Creus, took up the challenge. His 95 kg. (2091 lb. lead. Lee (Korea) also challenged with a 92.5 kg. (2032 lb.) snatch. De Pietro his highest competition jerk. This gave

Empress Hall, Earl's Court : August 9, 10, 11 him a total of 307.5 kg. (677) lb.), which superlative efforts in the fast lifts. The all the three lifts brought third place to

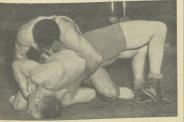

by OSCAR STATE Hon, Sec. British Amateur Weight-Lifters' Association.

R. Tom (U.S.A.). A final touch came from Four men exceeded the Olympic featheron the jerk, and Rodney Wilkes, a powerful 122.5 kg. (270 lb.) jerk to oust Salmassi from the lead. But what of Fayad ? Starting after everyone else had finished jerking. he smashed vet another world record with his last lift of 135 kg. (297 lb). Fayad's 332.5 kg. (732† lb.) total gave him a very

67

The first thrill in the light-weight class came from Stuart (Canada) when he pressed 107.5 kg. (236) lb.) to beat the Olympic record and claim the lead. His lead did not the snatch record, culminating with a tre-mendous effort from Shams of 115 kg, (253# lb.) that completely obliterated the else well behind. Halliday's great recovery in the snatch, after a disastrous start in the

into third place. Of the two Egyptians, Hamouda was the was 2.5 kg. (51 lb.) more than the existing in deathly silence, but it was not until the his nerves to make the attempt. As he pounced. Like a flash the bar came into his shoulders, and then was triumphantly overhead. He had equalled Hamouda's total of 360 kg. (7931 lb.) and, being the lighter man, was declared the winner. Touni (Egypt) was thought to have the middle-weight honours well in hand Sure enough he straight away beat the who were lying close behind, came through

FENCING

Palace of Engineeering, Wembley: July 30 - August 13

ENCING at the XIV Olympiad attracted a larger entry than at any previous Games, and the organisation at the Palace of Engineering at Wembley proved adequate to deal with the very heavy programme which this entailed.

The general standard of fencing was good, competition, often for very many hours daily, it is gratifying to record that there was an almost total absence of those unforin the past,

In the men's events there was no serious challenge to the age-old supremacy of France and Italy at foil and épée, and of Hungary at sabre. The close results in the preliminary rounds of the team events showed, however, that many of the other nations have made great progress, and a

number of them are now very equal. There were 42 entries for the Ladies' Individual Foils, which were won by Ilona Elek (Hungary), who had the distinction Berlin in 1936. Madame Elek fought throughout with a forcefulness and brio to Ellen Müller-Preis, of Austria, who won this Olympic title in 1932. Maria Cerra a count of hits scored.

France with clear wins in both team and France. Of medium height, and very rapid in the conception and execution of his times reminded one that he is also a very controlled foil play was in the highest tradition of the French school.

France, Italy, Belgium and the U.S.A. reached the final pool. Once again the crucial match was between France and Italy. This proved a grim struggle; the a lead of 6 victories to 3. Italy then staged a great recovery and, in spite of Buhan's seven fights to square the match at 8-8, and with only 14 hits scored against him in his seven fights. Second place went deservedly to Christian d'Oriola, the phenoappeared overtrained, and was less convincing than he was last year. Third place went to L. Maszlay (Hungary), whose some-Emrys Lloyd (Gt. Britain) fenced ex-

___bv___ C. L. de BEAUMONT Hon, Sec. Amateur Fencing Assoc.

René Bougnol (France) was suffering from the effects of a recent accident to his swordarm, and took fifth place by one hit over Manlio di Rosa, the only Italian to reach

Twenty-two' teams were entered at épéc and, after some very keen competition, France, Italy, Sweden and Denmark quali-fied for the final. The French team were clear winners, beating Italy 11-5, Sweden 11-4, and Denmark 9-1. The Italians started well in their match with France, form and only lost one more fight in the remaining eleven bouts. Michel Pecheux was in brilliant form, winning all pool. Italy took second place and Sweden were placed third. The Swedish team, whom many had regarded as probable winners, were disappointing in this final. The young Danish team are to be congratulated on a splendid performance and provided the surprise of the competition. They fenced with great courage throughout, and only lost third place to the much more

final pool of ten was reached. The final took five-and-a-half hours to decide, but the first five fencers were so closely matched that interest was sustained until the end Luigi Cantone (Italy), who had lost his first two bouts to his compatriots, came into the picture and, beating all his other opponents, was a clear winner with two victories

in hand over his nearest rivals. Cantone, a pupil of Maestro Visconti of day. A left-hander of medium height, he rule of épée fencing"-to hit without one-

The next four fencers all scored five

and twenty hits scored by each. A barrage therefore, necessary; in this Zappelli made no mistake and, mainly by served him so well all day, beat his more agile opponent 3-0 to take second place. hits behind and, by the same margin, I. M. Henry Lepage (France) and Carlo Agostoni

next two places with one hit between them.

and 69 individuals were entered, produced was never seriously challenged, and they won both titles as they had done in the last three Olympic Games.

Hungary, Italy, Belgium and the U.S.A. reached the final pool of the team event. The match between Hungary and Italy was a half-way stage, the result was never really in doubt, and the Hungarians, for whom T manner, were eventual winners by ten

Hungary beat their remaining opponents. competition for second and third places The good Belgian team composed of to strike their best form, and lost all their matches. At a late hour Italy and the U.S.A. met to decide second place. After a des-Dean Cetrulo s-1 in the last bout of the

GYMNASTICS

Empress Hall, Earl's Court: August 12, 13, 14

T was decided at the International Olympic Committee meeting at Stockholm, when venues for the Stockholm, when venues for the granustic events should be held in the main Stadium at Wembley. In view of the vagaries of the Baglish Gimmate, this senature of the Maglish Gimmate, the Committee of the Stockholm, who continually presend for an alternative venue in case of rain. However, the difficulties of transporting competitions, apparatus and aspectators, proved to be ever whelming, and the decision had to

stand.
On the first day, 9th August, it was found that after a rain storm on the previous night, the Stadium was too wet for safe working, and the Technical Committees of the International Federation held an emergency meeting on the ground. Both the men's and women's committees agreed to accept the offer of postposing the event until the 12th, 13th and 14th August, to be held at

Vaulting Horse:—1. K. E. Lindberg
(Sweden); 2. H. M. Schifano (U.S.A.);
3. J. Airey (Gt. Britain).

The general standard of work amongst the women gymnasts at this Olympiad was remarkably high, and if this progress is maintained one wonders what will be seen

Many lessons were learned during the course of the Earl's Court competitions, not only by the A.G.A. but also by the International Federation. Much time was and use its own apparatus, providing the measurements agree with the standards stated by the F.I.G. This is a matter that will be debated at a future meeting of the F.I.G. Technical Committees. The four

VOLUNTARY EXERCISES

should also be brought more into line; for marks given by the judges are added, and for the women, they are averaged. Again, compulsory and voluntary, whilst the women get 15 marks for the voluntary

The practice of allowing competitors to try the apparatus wasted much time during these competitions, and it is suggested that this practice should be strictly controlled to one exercise only for each

Earlier decisions on technical matters thereafter no alterations should be made. These conclusions are, of course, only the opinions of certain people concerned with the organisation of the event. Full

ROWING

Henley - on - Thames: August 5, 6, 7, 9

TWENTY-SEVEN countries were represented at the 1948 (Olympic Regatta at Henley-on-Thames), held on August 7, 6, 7 and 9, and much fine rading rewarded those who haved was from just above Temple Island to the normal Henley Regatta finish, a distance of about 1,880 m. (I mile, 300 yds.). During most of the week there was a considerable stream running, and the control of the property of the country of the property of the country of the property of the property

Though they are essentially individual contests, the Olympic events always have a strong international spirit about them, and the closeness of the competition is shown by the fact that Great Britain gained two 1xt's and one 2nd; U.S.A. two 1xt's and one 3rd; Denmark one 1xt, two 2nd's, and one 3rd; and Italy one 1xt, one 2nd, and the 1xt of the 1xt o

Both before and during the regatta anxiety was expressed about the ability of the repéchage draw to produce the three best crews in the final of each event. It is indeed hard to defend a system which, in one instance, necessitated rowing eighteen races to reduce the field from sixteened to the state of the state of

But the organizers cannot studied believed for the find allies of which were inherent in the fact that three places are awarded in Olympic races, and that only three crews can row abreast at Henley. No acceptable solution was part of the control of the control

The first day opened cold and wet, but with the wind tending to follow, with heats of the Coxed Fours. The United States and France were generally favoured, and respectively beat Great Britain and Finland without much difficulty. At the same time Switzerland and Denmark won their heats

safely. The next event, the Coxsuvainless Pairs, brought a shock to Great Britain when the veterans, Wilson and Laurie, struggled on to win by only two seconds from Italy. After their brilliant victory at Henley Regatta they were firm favourites, and indeed their supporters had been searching vainly to see whence any opposition was to come.

It was an example of the difficulty of judging the pace of crews of different nationalities, rowing in different styles, for, in the first round, four pairs were withness excounts of Great Britain's time of 7 mins. 20.3 secs. (Tally 7-22.2, Switzerland 7-20.4, Austria 7-19.3 and U.S.A. 7-20.3)

RICHARD BURNELL

Winner with B. Bushnell of the Olympic

In the Single Sculls three winners of the

In the Single seems into somewhat or to the first time, and the first time, are the first time, and a seeded one. Wood Anastralia, Kelly (U.S.A.), and Sephériadés (France) were all drawn separately, as also was Rowe (Great Britain), the only outsider considered to have a chance. All won convincingly.

The afternoon opened with heats of the Coxed Pairs, in which the only occurrence of particular interest was the defeat of Demmark, the ultimate winners, by Italy, In the Coxwwinless Fours Great British were favourites, with Italy and the Netherlands looked on as their most likely challengers. All won their heats fairly safely, and few watchers could have foreseen that Denmark, finishing second to Italy, were destined to

In the Double Scalls a light and lively French pair gained a surprise victory over Great Britain, the ultimate winners, and Belgium beat the Netherlands counvincigly, confirming themselves as one of the most formidable combinations. The lights, like the Single Scalls, might almovers out, and Great Britain, tally and the United States all came through safely, if by comparatively small margins in the case of the first two. The second day was devoted to the repéchage, which were rowed, for the most part, against a stiff head wind. In the morning there was little of special note, though Italy won their way back into the Lough Italy was their way back into the United States. It would have been a circuman who could have foreseen from Risso of Unuquay's close win over Keller of Switzer-land, that he was destined to make scaling and, the was destined to make scaling of The Williams, that he was destined to make scaling or mins 24,3 sec. was a good one.

In the afternoon Demnark and Hungary, both beaten by Italy in the first round of the Coxed Pairs, won their respective heats into the Coxwalless Four semi-final, in the Double Sculls, Bushnell and myself (Great Britain) recovered our form to win of the Coxwall of the Coxwall

Fehaps the most vital minutes of the whole regaths were during the date for the whole regaths were during the date for the Proon this tage on their could be no further properties. The state of the could be an outsingle scallers were drawn together in two clarked at this stage; and in the Double heart, bough at best two of them must have clarked at this stage; and in the Double what concentrated in the first semi-final, with Great Britain, U.S.A. and Belgium with Great Britain, U.S.A. and Belgium that time. But the draw for the rowing creats was extraordinarily good, with the which that was developed to the country of which that we developed the country of which that we developed the country of the country of which that we developed the country of the three country of the country

Racing started on Saturday with the Coxed Fours, in which event there were still two rounds to go, and there were no surprises at first. In the Coxewindness Pairs the Australians finally fell to Switzerland, with the sympathy of many spectators who had seen them struggle against a good deal of seen them struggle against a good deal of a seen them struggle against a good deal of a Marlow entry in the word and Laurie had quite recovered their form, and wen easily against Brazil.

Conditions were at their very worst on this day, with rain and a gusty head wind

to the regatta's most dramatic race. It was confidently expected that Rowe, of Great in the Coxed Fours semi-finals, the United at Henley Regatta, would give Kelly a hard fight. Kelly set a tremendous pace in his determination to dominate Rowe, who had no choice but to try to go with him. In terrible conditions of wind and rain Kelly did succeed in battering down Rowe, but he of victory and was therefore sculling. comparatively speaking, within himself, suddenly found himself level with Rowe and only a length or so behind Kelly. A splendid spurt up the enclosures gave him a Séphériadés of France in the prevailing

In the Coxed Pairs Denmark won a fine race by 2 secs, from France, who were unlucky not to reach the final. The second moment of drama came when Denmark and staved off their every effort, to win by 3 secs. In the Double Sculls, Great Britain over the United States, with Belgium a the United States, Great Britain, and Nor-

States, Denmark and Switzerland all came through safely. In this event, too, France were perhaps unlucky to be drawn against the ultimate winners

The finals were held on Monday afternoon when, for the first time, the sun shone wind, now blowing across the course, dropped to a reasonable force. The racing win by the United States in the Coxed Fours, with Switzerland second, and Denmark third. In the next race, the Coxswainless Pairs, Wilson and Laurie, of Great from Switzerland, with Italy third. Ten years' absence from the river separated the British pair's win from their victory in the Olympic performance was a beautiful example of British rowing at its best. Following the Pairs Final, Wood, of Australia. won the Single Sculls with some ease from Risso (Uruguay), and Catasta (Italy),

thereby giving Australia her third win in In the Coxed Pairs, Denmark gained a

Hungary. It is interesting to note that this reversed the result of their first round heat. In the Coxswainless Fours it was Italy's turn to beat Denmark into second inishing third. In the Double Sculls Bushnell and myself, of Great Britain, won safely from Parsner and Larsen (Denmark)

with Uruguay third. In the Eights the United States University of California crew won by 10 secs. from Great Britain, though the latter had led them during the early stages of the race. Norway were a good third. Just as Wilson and Lauric exemplified the best of English that is best in their way of rowing. They were beautifully together, and immensely powerful, with that strong finish which seems to be the main feature of American rowing.

A regatta of this sort must always bring disappointments as well as triumphs, but all those concerned with the Olympic Regatta at Henley-on-Thames must have felt that the results justified the effortwhich went into their making, and that both Henley could be justly proud of what had

well-earned first success, beating Italy and

a century ago. The canoeing programme was made up of 10,000 m.; four over 1,000 m.; and one over 500 m. The craft used were kayak singles and pairs (K.1 and K.2), Canadian singles and pairs (C.1 and C.2), and kavak

singles for women. The 10,000 m. events were all held on the first day, and the course used was made up of four laps, two downstream and two upstream. Starting from the finishing line, the course was downstream to Temple Island, around which a turn was made in an anti-clockwise direction. It then went upstream past the enclosures, through Henley Bridge to Rod Evot, the first island above the bridge. A turn was made about this island, and the course then continued downstream through the bridge, and back to Temple Island. After a second turn about this island, the course allowed a straight 2,000 m. to the usual finishing line. This gruelling course provided the competitors with a variety of water conditions. and enabled the spectators to see far more "straight" course as used in Berlin in 1936.

race started there were few spectators, although the rain had cleared. As the afternoon advanced more people came. the large entry and narrow course made a collective" start impossible, and recourse had to be made to "interval" starts, the kayaks being sent off at intervals of 30 seconds. Under international rules it is not permitted to hold heats for the long

I. W. DUDDERIDGE Hon, Sec. British Cance Union

course events. Interval starts are not popular, for neither competitors nor spectators can gauge the exact position at any moment: each competitor has to race against the clock—a very difficult technique. and it was possible to employ a normal start for both singles and pairs

The programme opened with kayak pairs, which was won by Akerlund and Wetterström (Sweden). A striking feature of the rikssen (Sweden) made his appearance, and impressed everyone by his superb technique and immense power. Already well known in European competitions, Fredrikssen set the seal on his fame by taking first place in collapsed into the water, and had to be just crossed the line. When the results were announced it was found that Wires had gained second place.

The Canadian canoe events proved very interesting on account of the different techniques employed by the various crews Macknowski, soon took the lead and were win by a margin of nearly 2 minutes, some the Turning Point Control on Rod Eyot that the leading canoe had fouled one of the buoys on the turn. In deciding against any disqualification, the judges were influenced by the fact that the buoy was not by the canoe and by the fact that the incident did not affect the issue of the race in any way.

The singles race, the last on the day's programme, proved to be a great test of endurance. It was the first time that a Canadian singles race had been held over such a long course, and many had believed it to be too long. In this event there appeared, for the first time, what came to be described as the "crooked" canoes. These canoes had been brought over by several European teams, and the chief feature which distinguished them from keel, so that it runs true. If the keel is curved, the canoe will have a tendency to turn to one side. When a canoe is paddled by one man using a single blade, the drive of the paddle on one side tends to turn the canoe away from the paddling side. This

6 m 38.1 s

mum loss of power is the chief factor in single Canadian technique. By curving the keel in the appropriate direction, the two turning tendencies can be made to neutralise each other, and the canoe will run straight without need for steering by the paddler. devote the whole of his strength and effort over an opponent who has to steer as well

At the I.C.F. Congress before the Regatta, certain nations had registered a protest against the admission of these canoes but, rejected because the canoes did not violate the letter of the rules. It was agreed that the development was undesirable, and against the best interests of the sport, and the building rule was so amended as to In the singles the Czech team lent one of their canoes to the American competitor, and it was a striking fact that the first two canoes home were of the "crooked" type. Lane (Canada) came in third place in a

The second day brought the full programme of short course events, and the to hold the heats in the morning, the finals in the evening. With eight canoes in each final, heats were needed for the kayak events only, the Canadian events going through to the final.

The kayak events, both singles and pairs, again brought success to Scandinavia, for in the pairs a very fine race gave Berglund the first five crossed the line within a period of less than three seconds. It was in this final that the Hungarian pair, Toldi and

Andrassi, were disqualified by the umpire for "hanging" in the wake of another canoe.

This practice is forbidden under international rules, but in a short distance event, with only the minimum distance between the craft at the start, it is not always easy to avoid the appearance of "hanging," even decision came very hard on them.

The single kayaks gave Fredrikssen, of Sweden a chance to demonstrate his superiority and confidence in a striking fashion. During his heat he had allowed a spurt, passed all the others, and finished first, a split second ahead of Akerfelt (Finland). In the final he crossed the line a clear six seconds ahead of the runner-up. Andersen (Denmark), who had won the

In the Canadian singles, Bennett (Canada) showed that the great confidence placed in him by his association had not been undeserved. In spite of the handicap of racing in a straight canoe against the other type, he succeeded in gaining second place to Holecek (Czechoslovakia). It was interesting in this race to see how the elimi-nation of the need for steering had influenced paddling style. A new technique had been evolved which gave maximum eneral cruising or rapid-running practice. This factor is important, for it is generally claimed by all racing men that the skill developed in competition can be usefully employed in general use, and will in time lead to improved techniques.

The Canadian pairs developed into a duel between the Czechoslovakian and line about three quarters of a length ahead KAYAK SINGLES (10,000 m.) I G Ecodellesson (Sweden)

One of the most interesting events on the programme was the 500 m. kayak countries women take a very active part in brought to bear which led to the women ing programme. Ten nations took part in the competition, and the standard was extremely high. The order of the final repeated that of the second heat, a remark-

Regarded as a whole, the Canoe Regattabrought few surprises, and the results followed forecasts closely. With the solitary exception of the 1,000 m. K.1 3rd place, which went to Eberhardt (France), the first three places in every kayak event went to In the single blade events Czechoslovakia

The craft used by all the teams aroused great interest and admiration, and the out. Canoe racing in Britain, formerly centred on the Royal Canoe Club, was in a state of complete suspension from 1939 to 1947. The British team for the Games had to be forged in less than a year and, as period of preparation was reduced to about six months. The normal period of training for international competition is three or four years and, although the British comthey showed good style, pluck and determination. To have put up the show they did after such a brief period of preparation did them great credit and held out much promise for the future

London area and Wembley Stadium; July 31-August 12

by C. E. NEWHAM (Ex-President Indian Hockey Federation)

INDIA—OLYMPIC CHAMPIONS, Standing (from Inf): J. 2. Rajput, R. 5. Gentle, A. C. Komar, T. Singh, K. D. Singh, Kibas Lui, G. Singh, K. C. Datt, W. J. L. De Souza, G. R. Glecken, R. Francis. Battam Rev (from Inft): L. Clevelou, B. D. Obanghi, Pitate Vast. L. Francisc, L. H. K. Phito, L. Rehman, P. A. Janson.

THE Indians are today the undisputed hockey champions of
fourth successive Olympic victory. It
was a great achievement indeed to
was a great achievement indeed to
was a great achievement indeed to
act Amsterdam, Los Angeles, and
Berlin. Yet India, and the international
bockey fraternly in general, felt that
the Olympic tide could only become
an unqualified world title when it
are the control of the control of the control
for the two countries had never met
in any match.

Many membranes and the second second

Two years of patient work solved most of the problems, but there still remained difficulties, including the fact that hockey had never hitherto been played much later than Easter in the British Isles.

Determination and enthusiams eventually conquered all difficulties. Briting, unflitted to the International Federation for the first time, undertook the task of raising and training a hockey team, and the still greater ment in history. As one indication of what this entailed, three first-class grounds and the practice grounds had to be found and prepared, willin easy resth of the Olympic and all good grounds in London are used for

cricket and tennis in the summer, this entailed no small sacrifice for some weeks by the members of the clubs concerned.

Of the eighteen nations which originally entered, sixteen confirmed their entries by the official closing date of June 16th. This remained the position until 48 hours before the Opening Ceremony of the XIV Olymphat, when a final check showed that Poland, Hungary, and Cacchoslovakin had not arrived and had failed to give notice of their inability to arrive.

By Olympic regulations, this entailed the division of the remaining thirteen nations in the remaining thirteen nations are proups instead of the original control of the co

India had an easy passage to the seminal, shough the peaked Spanish defence had been as the peaked Spanish defence wards found themselves nonplused for words found themselves nonplused for cose, and could store only two geals, cose, and could store only two geals, ones, and could store only two geals international term, and it was based on the international term, and it was based on the players proved to be good individually and players proved to be good individually and confectively. They improve with every confectively. They improve with every confectively they improve with every show. Austrian hockey is best with distrishow. Austrian hockey is best with distrishow. Austrian hockey is best with distrishow. Austrian hockey is best with distrishow they are the confection of the conclude as present, but the Olympic term conference of the conference which do the concentration on defence which do the concentration on defence which do

Great Britain also reached the semi-final without difficulty, after an anxious first game against Switzerland. The Swiss relied upon a packed defence, using eight sturdy and hard-hitting players for that purpose. Some of the tactics were more suitable for ice than field hockey, but heroic determination of the property of the p

In Group C the standard cast light and very even. Demantik was undezly to earn only one point and, in company with one point and, in company with one point and, in company with obscle, which was attracted, selected by a standard control of the co

Thus it came shoul, in scordince with the Oympire Isal, that the semi-sinals were fought out between India and the Nethershas, and between Great British and Pakis-shas, and between Great British and Pakis-shas, and though detailed the Control of the Isale of Establish considered the Dutch team a shade Sustainan considered the Dutch team a shade sugaring Great British, which the Inter won 2-to in an all-out effort. Both team were a specific or the Isale of Isale

Twenty-five thousand spectators flocked to the Stadium for the final between India and Great Britain, a match for the Cal and world championship, between the contrasting styles of the East and West, between the new world and the old in the contrasting styles of the East and West, between the new world and the old in the contrasting styles of the State India and the Cal and th

The British defence, which had not previously conceiled decirous which had not previously conceiled determination to the Pily except resolute determination to the Pily except resolute determination to the Pily except resolute determination to the British Indians forwards and labers. The British Indians forwards and labers. The British the Work of the British Briti

they found a very competent defence.

The final then can be simply summed up as a convincing victory for the better side, or in the words of the British players themselves: "We were well and truly beaten by

the best team in the world." No excuses need be offered, or explanations attempted, although it may be of interest for record purposes that the average age of the Indian players was twenty, as against thirty for the British team.

The Pakistan players clearly felt the strain of a great semi-final for, after drawing 1-1 in the match against the Netherlands for third place, they could not reproduce their best form in the replay, and were beaten 4-1. And so, as the International Federation had estimated, the final placings were: India 1st; Great Britain 2nd; Netherlands 2nd; Pakistan 4th.

It had been a memorable Olympic championship in every way, not least in its demonstration of the growth of the game in quality and popularity. Hockey is now played in 32 countries, while at the time of the first Olympic hockey championship in 1908, organised hockey was almost entirely confined to the British Isles.

In the interim the British Hockey Board has come into being, and Great Britain is thus, for the first time, able and willing to play a full part in the affairs of the International Federation, a welcome development which the latter organisation has described as "the most important event in the hockey world for the last 30 years."

The Olympic toursament was most admirably conducted by the International Federation, with the wholebearted technical sastiance of the Hockey Aucental frend-alienses and good will on all sides. Finally, the XIV Olympial decided, for the next containly argued the third that the could find, well trained and superbly fit, but the Olympic champions since 1258 set the seal on their supremsety. So, until when the other could find, well trained and superbly fit, but the Olympic champions since 1258 set the seal on their supremsety. So, until several champions from 1258 set when the Olympic and world champions from the Olympic and

LACROSSE DEMONSTRATION

Wembley Stadium: August 5 by G. H. BARK (Hon. Sec. English Lacrosse Union)

THE regulations and general rules for the celebration of the Olympic Games empower the Organising Committee to organise demonstrations of two sports not included in the programme, viz., a national sport and a sport foreign to

the organising country.

The national sport chosen by the Organising Committee of the XIVth Olympiad was men's lacrosse, and a match was staged between an All-England team and the team of the Rensselaer Polytechnic Institute, of Troy, New York, U.S.A., at Wembley Stadium, on Thursday, August 5th, 1948.

The game was played in four quarter

periods of 20 minutes cach.

England opened the scoring with a goal from Whittaker, but following sustained pressure from the Americans, Coleman equalised. This was followed by two goals from Myers and one from Wood which gave the Americans a lead of 4—1. A brill-lant bout of passing by the English attack.

HE regulations and general rules for the celebration of the Columnia Games empower the Olymnia Games empower the

In the second period a single brilliant goal from Wilson further reduced the margin to 4—3. In the third period neither side scored, notwithstanding some excellent lacrosse by both sides.

The fourth period opened with a masterly

The fourth period opened with a masterly goal from Whitraker, after which Dennis area in the period opened which Dennis area in the period opened with a period of the period opened with a period ope

The game was one of the best exhibitions of increased. The seen in England for a long time. In the control of the magnificent recovery of the England team from their early disadvantage was a tribute to the superbliveliness of their attack, the solidarity of their defence, and their magnificent handling and passing throughout the game.

The teams who took the field were :-

BY APPOINTMENT TO H.M. THE KING

A Champion Team

Every member of the Meltonian team of famous Shoe Dressings has a special part to play in the care of fine footwear. Here are some of them. BLACK, BROWN & WHITE CREAMS

in tubes and jars for Leather Shoes, SPORTS WHITE for White Canvas and Buckskin Shoes, in bottles,

LIQUID WHITE for White Kid, Suede and all White Leathers, in bottles.

THERE IS A

preparation for every type of shoe in every

of the knees and legs.

Aldershot area and Wembley Stadium: August 9 - 14 other hand, was particularly good at the

THE equestrian events at the XIV Olympics comprised, as usual, three competitions :- The Individual Dressage Test, the Three Days' Event [consisting of a Dressage Test (first day); an Endurance, Speed and Cross-Country Test (second day); and a Jumping Test (third day)], and the Jumping Competition (Prix des

As might be expected so soon after the end of the war, the total number of participating nations and competitors was some-

Taking part were, first of all, the three by Italy, Spain, Portugal, Argentina, Brazil and Mexico, and some of the smaller the war, such as Austria, Denmark, Finland that did not take direct part in the war were Great Britain, who had made a special

The standard of performance at the Individual Dressage Test, which was held at the Command Central Stadium at Aldershot, was as high as ever. Allowing for the rather short period available for training since the end of the war, the test than the Berlin test, omitting the Passage and the Piaffe. Still, it included several

and Col. A. R. Jousseaume (France), took part in the 1936 Olympiad.

Capt. Moser, riding a fine brown horse, the horse, Hunner, was perfectly balanced with an excellent mouth, only the hindsuppleness now and again. The transitions at the walk. The horse was, at times, not quite straight at the canter, and the pirou-ettes were a little hurried; the bending on

The second, Col Jousseaume, on the brilliant Anglo-Arab, Harpagon, on the sive grey thoroughbred. Fourth was Capt

A. Blaser (Switzerland) on Mahmud, who walk and the pirouettes, as well as at the had the most perfect seat of all. From the changes of leg, in spite of the fact that the horse was not quite supple at the poll, was on an average only one mark difference Trumf, third, an exceptionally good

between each competitor and the next. The team placings after this day's first event were: I-Switzerland; 2-France; 3-U.S.A. One competitor (Netherlands) was unable to start owing to his horse being

The second day's test comprised the Endurance, Speed and Cross-country events, at a speed of 220 m. (240 yards) a minute; 15 km. over roads at a speed of 220 m. a minute; 8 km. cross-country, jumping 34 obstacles, at a speed of 450 m. (490 yards) a minute; and 1 km. on the flat at a speed

of 333 m. (360 yards) a minute.

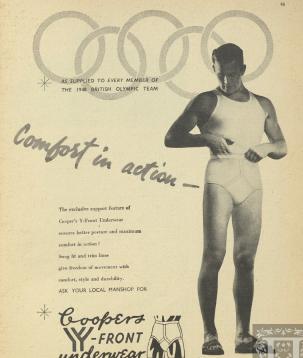

The most difficult part of the distance was the cross-country ride with the 34 obstacles. These were not very high-1.20 m. (4 feet) maximum—but arranged so as to show the handiness of a horse over bank out of the road; jumping a triple water jump consisting of three ditches with just enough space between for the horse to land and take off; jumping a drop fence (over a rail on to a long, steep, sandy chute).

easy side, and only a couple of competitors did not complete it. Lt.-Col. H. Sauer (Austria), fell into one of the ditches of the on, probably owing to having got water in his ears. Col. Jousseaume, who had done so well the previous day, had two falls, which caused his horse to pull a shoe, the previous day, also had two falls, but was able to complete the event. One of the British horses, Dark Seal, ridden by Major D. N. Stewart, pulled up lame after the Endurance and Speed tests and was

The outstanding performance was that of Capt. Chevallier (France), who made a clear round of the cross-country course at a gallop on his excellent Anglo-Arab, Aiglonne. Individual placings after the second day's event were: 1—Capt. Chevallier (France); 2—Lt. Anderson (U.S.A.); 3—Lt.-Col. Henry (U.S.A.). Team placings: 1—Denmark; 2—U.S.A.; 3—Sweden. The third day's event was a jumping competition held at the Aldershot Stadium, the abiting of the chief.

the object of which was to find out if the day's strenuous test. The course over twelve obstacles, not exceeding 1.20 m., was rather intricate, requiring a handy horse. Thirty-three competitors finished; one was eliminated for refusals, and four

The winner of the whole event was Capt. Chevallier, the only competitor with plus marks ; second was Lt.-Col. Henry (U.S.A.):

LYLE & SCOTT LTD., IDEAL HOUSE, ARGYLL ST., LONDON, W.I AND HAWICK, SCOTLAND

third, Capt. Selfelt (Sweden). Team placings were: 1 — U.S.A.; 2 — Sweden; 3 —

The lumping Competition (Prix des Nations) took place at Wembley Studium over a course with 16 obstacks, necessitating or jumpy, 1,39—40, m. (d. 1; im—10; im). (d. 1; im).

ustanding French rider, Chevalier of Organic, on Sucre de Posmes, was the first to incur eight faults only. Col. Wing (U.S.A.) on Democrac, and R. Uriza (Mexico) on Hatrey, in turn repeated this score which, however, was beaten by the very last competitor, H. M. Cortes (Mexico) on Arets, who incurred 6½ faults only, and thus

Decline tile vinnier, with 8 faults each, jumped off over the last six obstacles of which the last six obstacles of which the service was placed second (o faults), d'Orgeis (France) third (4 faults 38.9 secs.) and Wing (US A.) fourth (4 faults, 40.1 secs.). Team placings: 1—Mexico; 2—50ain; 3—67cet British. No other team

of three completed the event.

The British Horse Society, which was responsible for the training and selection of the British team, feel satisfied with their performance considering the team had only the months training.

The selection of the s

MODERN PENTATHLON

Aldershot area: July 30, 31, August 2, 3, 4

THE Modern Pentathlon competition of the XIV Olympic Games was held at various venues in the neighbourhood of Aldershot. The competitors, together with those taking part in the equestrian events, were housed in the New College of the Royal Military Academy, Sandhurst, at Camberley. The venues were chosen to give the best possible conditions for Olympic Games events. The 5,000 m. riding course with 22 jumps was laid over Tweseldown. Aldershot Borough Council lent their magnificent open air swimming bath, giving a competition length of 50 m. Full advantage was taken of the provision of electrically-operated targets on the specially built pistol range at Bisley to take the shooting event to the headquarters of the National Rifle

Association.

There was never any doubt that the excellent wooded country in the immediate neighbourhood of Sandhurst would provide the most interesting cross-country course. It was decided to hold the fencing competition in the two spacious gymnasia at the Army School of Physical Training in order to obtain sufficient floor space for eight

One of the biggest problems confronting the Organising. Committee was the programmittee was the proterm of the problems of the riding event, but with the help of the military authorities the Organising Committee were able to acquire firthy notice from Germany, and offers or so were provided by John Of Great Modern Permitted and the problems of the problems of

The Modern Pentathlon started with the 30th July. It was indeed too hot, and this may have affected the performance of some so much in this event that there is little advantage in comparing times, but it is interesting to note that only nine riders (twenty-five at Berlin) completed the course within the new time limit of ten minutes or 500 m. per minute, as compared with 450 m. per minute at Berlin. The course was made easier than at Berlin in order to keep the conditions within the capabilities another nine riders completed the course without scoring any obstacle faults, but suffered penalties for being over time. A further five completed the course under time but lost points for faulty obstacle clearance on the way.

Capt. Grut (Sweden) started off on his series of event wins by beating the American, Major Moore, by 4.5 secs. in 9 mins. 18.2 secs. Lt. J. M. G. Lumsden gained the only British place in the competition by finishing third, 6 secs, behind Moore. L/CpJ. A. C. Martin also finished with a clear round but lost four points on time

In the opinion of those who had been at Refligh, the standard of feedings showed some improvement. Sarudday, 31st July, proved a one and practing day, as all interplete a long and practing day, as all interplete had been so that the standard stan

The British resm had more than their fair share of double hits, which count as a loss to both fencers, but Lt. G. A. G. Brooke (first member of the Royal Navy to represent Great Britain in the Pentathlon) fenced steadily throughout the day to finish 13th with 20 wins.

by Lt.-Col. O. G. W. WHITE, D.S.O. Hon, Sec. Modern Pentathlan Association

of Great Britain

Nevertneless, tirtu dia wei, 6 with the mins. 17 seCs., a time which has only twice before been bettered in an Olympic Pentathion. This was Gruft's third victory, a new Olympic record. Sgt. Szondy (Hungary) was second with 4 mins. 21.1 seCs., 1.t. Villko (Finland) third in 4 mins. 74 seCs.

The weather had cleared for the final day on 4th August and conditions were again excellent for the running event held in the grounds of the Royal Military. There was not much doubt that he would become the seventh Olympic Champion, and so re-start the old run of Swedish victories which had been brohen at Berlin. But would he finish in the first nine, and so less than 18 spoins in the entire connecticular the second of the second of

The incomparable Grut answered the query for us by coming eighth, scoring 16 points in the Modern Pentathion to gain that second record.

Again it is difficult to make a reasonable comparison of times in the running event with previous Games. This course of 4,000 m. (approx. 2 miles \$52 yards) was cerden to the course of the way round, and over rough going through bracken and along woodland paths. Only three runners beat 19 mins, with the arcounte, a Swede 2 LL Weblin, withink greaters, and the course of the cour

The British team, with some good running by Martin (11th), all finished in the first twenty in this event, traditionally their strongest, and in doing so achieved their best combined performance of the competition. Brooke, lacking his usual fire, finished 15th and Lumsden 20th

Abbough Grut's record-breaking performances were the constanding features of formances were the constanding features of these was keen competition for runner-upbetween Moore (U.S.A.) and Gildfind, who only as a last minute substitute. Whatever part tack may play in Pentalbon, Moore performance to maintain his position of constant and the constant of the systemic specific properties of the constant of the standard properties of the systemic after the conclusion of the systemics of the conclusion of the systemics of the conclusion of the systemics of the systemic properties of the contraction of the systemics of the the riding event by finishing ath and systemic properties. Here fought hard to finish the riding event by finishing ath and systemic properties. Here fought hard to finish

The original 47 entries from 17 countries were reduced before the first day to 45 starters, and two further casualities in the riding event—Karacson, already mentioned, and the veteran Mollet, of Belgium, reduced these numbers eventually to 43.

As there is at present no team competition in the Olympic Modern Pentathlon, it is impossible to give a team result. However, an unofficial record, based on the inhalorder of merit, can be made for the properties of merit, can be made for the properties of the properties. If the final can of these teams are added toget the properties of the properties of the properties of the properties.

BASKETBALL

Harringay Arena: July 30 - August 13

days of Olympic basketball at Harringay, where I witnessed eighty-five games, certain mental pictures stand out in memory. As Arena Manager, I had the privilege of meeting all the officials and teams, and I was greatly impressed with the deep and sincere spirit of friendship and good will which prevailed throughout the Games. Certain matches were, of course, fought out with grim and fiery determination - particularly by the South American countries - but, as soon as the games were finished, the spirit of the Olympics triumphed and

friendship prevailed. These are not mere words, as many team they were concerned, gave them wonderful

the standard of basketball to a higher level. it briefly. First, it should be remembered that the Olympic Games constitute basketball's world championships: thus an ordinary knock-out competition would be plaints about the expense of travelling thousands of miles just for one game.

As 23 countries were competing, four preliminary groups were established, with one of the four leading teams of the 1936 then the first two of each group-eight teams-played off on a knock-out system 9-16, and the 5th and 6th teams played for the 17th to 23rd positions.

My second outstanding impression was of the magnificent physique of the competitors. Jack Budd, who was so helpful

Victoria and Albert Museum, London : July 15- August 14. HOW appropriate it was that the officials responsible for the exhibition and what is the connection beselection of posters of the XIVth tween art and a festival of physical skill and Modern Olympiad should have chosen a design embodying the silhouette of Myron's "Discus Thrower" seen

against a London background! The

poster linked the origin of the games

in Ancient Greece with their latest

It did more. It helped to answer a

question often heard about the Olympic

Art Exhibition at the Victoria and Albert

HOMAGE TO LING, winning Sculpture by

manifestation in the British capital.

Myron, one of the geniuses of the Greek golden age, the fifth century B.C., was the the round various aspects of violent movement. And he found inspiration for his most celebrated single figure in the graceful and powerful attitude of an athlete about to hurl a heavy piece of metal. The Greek knowledge of human muscular beauty by watching young men and girls perform in

Would the religious and sporting cere-monies staged so long ago at the national sanctuaries of Delphi and Olympia have much meaning and glamour for us if masterpieces of sculpture and vase painting

sports champions does not endure very long unless art or literature step in and confer charioteer found amidst the ruins of Delphi still stirs the beholder's imagination. Gordon Richards cannot hope to be remembered in A.D. 4400 unless an equally striking effigy of him then exists. When Baron de Coubertin revived the

time the cultural and ethical ideals that animated the original contests. Hence the artistic and literary competitions which he instituted. That part of his programme

When one looked round the galleries at the Victoria and Albert Museum one had to deplore the absence of most of the best-known living artists. We were told that because of the lack of interest by American artists in the art section at the Berlin Games in 1936 the United States Olympic Committee decided against participation."

There were other glaring gaps. Among which recent controversies had made familiar in every household-like Matisse and Braque

Even Dufy, who has produced many a lively picture on a sporting theme, and Vlaminck, former star cyclist, abstained A minor etching by Dunoyer de Segonzac, "Start of the Hundred Metres," alone represented the "proved champions" of artistic France.

And yet there was a great deal that merited our close attention and admiration. from as far away as China.

The paintings in oils included no fewer than 25 examples of Sir Alfred Munnings' studies and finished compositions of horse racing (not entered for the awards). He is the first sporting artist ever to become President of the Royal Academy, and as such worthily presided, as it were, over the whole show. Let me anticipate possible fault finders by saying that Sir Alfred's Victorian predecessor, Sir Francis Grant,

Museum, and about the award of Olympic an able sporting painter, was elected P.R.A. on the strength of his portrainte

Sport, indeed, was long considered an inferior subject-matter. The magnificent George Stubbs, because he concentrated His high place in the British School is, nevertheless, assured and sporting art no longer plays the part of a Cinderella.

Generally speaking, good sporting art also on a genuine understanding of the scene depicted. The rhythm and balance of good art go hand in hand with the rhythm and balance displayed by the good

Whether the artist sticks to visual truth not alter the fact that the more deeply he the better will be the result. Riding, for instance, is highly skilled, and we would who have studied the science of horse-

Therefore, we applauded the first prize given to the deaf and dumb R.A., A. R. Thomson, whose virile oil painting of the "London Amateur Boxing Championships" came from a hand that often wore a boxing glove in his younger days. Likewise, the Italian Giovanni Stradone's "The Cyclist" expert watcher's eye.

In the graphic arts the chief award rightly went to the Frenchman, Albert Decaris, for an admirable plate of a "Swimming Pool" remarkably composed and carried out, and suggesting all the delights

Art cannot be judged with the help of stop-watches. Some of the judges' decisions might not be unanimously approved. I "Homage to Ling" (Ling was the creator of Swedish drill), by the Swede, Gustaf Nordahl, however capable as a specimen of straightforward modelling, lacked real sport-

Striking and apposite plastic studies of movement abounded. There were, for instance, the figure skater by Britain's C. Kar (2nd prize), the springy runner by Coulon's panting "Wrestlers," and Belgian Count Van den Steen's almost terrifyingly realistic "Skier," nose-diving towards the onlooker.

The architectural room contained plans and models of imposing athletic centres far and near. What an important place now long to visit the island of Varkaus provided for the development of a healthy surroundings, a lofty aim for sport and

A word of praise is due to Major A. A. Longden, organiser of the exhibition. understand that it was solely due to his efforts that an Olympic Art competition again took place.

1946-It may be of interest to note that the 1920. They symbolise the five continents because at that time at least one of these colours appeared in every national flag.

Organisation of the XIVth Olympiad

IN June, 1936, at the instigation of the Council of the B.O.A., the Lord Mayor of London submitted a request to the International Olympic Committee that the 1940 and of 1944 were not held.

In February, 1946, the Council again venue for the 1948 Olympic meeting, and on March 14, 1946, the Council were informed that the XIVth Olympiad would undertake the necessary preliminary work, and within a few weeks the Organising Committee for the XIVth Olympiad was

Thereafter the British Olympic Association confined its activities to making all the arrangements necessary for the proper equipment, housing and transport of the British representatives for the Games. It

The main responsibility for these arrangements fell to the Housing, Equipment and Transport Committee of the Association, with Mr. P. F. Cranmer as Chairman. The speaks volumes for the work of the Com-mittees concerned.

Equipment

IT is almost universally agreed that the 1948 British Olympic team outshone in appearance any previous British Olympic Arthur Howard & Co., who supplied the men's equipment, Messrs. Bourne & Hollingsworth, who were responsible for Wear, who presented both teams with the headgear. The men competitors and team Games, 1948" on the pocket. The headthe blazer, with a Union Jack badge. The women were in white dresses with a blue jacket and badge, and white berets.

Housing

HIGH praise was forthcoming for the Olympic Centre at Uxbridge (the largest single out any of those responsible, special thanks are due to Mr. A. J. Adams, the Housing Commandant at Uxbridge, and his colleagues, as well as to the caterers there, Messrs, John Gardner.

Opening and Closing Ceremonies

ALL members of the various British teams were most anxious to take part in the those who were competing the next day should not parade. The wisdom of this Wing-Commander Donald Finlay, who

St. Moritz, Switzerland, venue from January 30 to February 8, 1948, of the

Vth WINTER OLYMPIC GAMES

A S became clear five months later, there were many similarities between the Vh Winner Garden St. Moritz, Switzerland of the XIVth Summer Games in London. The weather played its praints at both, organisation was criticised, favourites did not have it all their own way, and Sweden proved the outstanding all-round nation. Last, but not least, in spite of all difficulties, both Games proved great successes.

It was not only the weather that presented the organisers at St. Mortize with almost insurmountable difficulties. Several urgent insurmountable difficulties. Several urgent insurmountable of the several urgent of the total urgent of the several urgent of the several urgent of the USA, which the several urgent of the USA, which the several urgent of the USA. Olympic Committee; the other USA. Olympic Committee; the other proported by this unabharity, the not accepted proported by the subharity, the not accepted the several urgent of the urgent of the

Thus we were treated to the spectacle of one U.S.A. team marching in the ceremonial parade, watched by the other U.S.A. team sitting on the stand. Then the parts

were reversed. The team that had marched behind the Stars and Stripes sat on the stand and the other team played in the tournament. The pleasing thing, however, was that in the end loe-Hockey was deemed an Olympic competition and the winners received their merchel.

It spites of there being a surplus of snow on some days and of sun on others, the organisers and the 932 atthlets representing 29 atthlets representing 29 atthlets representing 29 atthlets representing 29 atthlets represented by the property of the prope

Conditions were often exasperating on the ice as well as on the snow. The ski-jumpers had to compete in heavy snow and almost in fog, hardly seeing where they were to land after their flight, starting 330ft, above their landing level. Speed skaters suffered from almost impossible ice conditions and, as Col. Evan Hunter, the British Chef de Mission, put it: "The final ice-hockey game between Switzerland and

Canada might just as well have been played on a sheet of mazipan." Three British players sprained their ankles in the very first match and the L.I.H.S. decided that in future their championships must only be held on artificial ice.

Norway dominated the ice, as Sweden dominated the "snow" section of the Games, the Swedes obtaining the highest namber of (admittedly absolutely unofficial) points. Switzerland, the host country followed closely, and the U.S.A were also flowed closely, and the U.S.A were also most successful nation, and on the fourth occasion (Lake Placid, 1932) they were runners—up to America, competing at home.

The Norwegams, like the Finns, the British and others, were severely handicapped by the war years, and as far as winter sports are concerned the British handicup was probably the greatest, as British winter sports always had to be reared on foreign snow and slopes, in Switzerland, Austria, Norway, etc., and there had been no opportunity for this for almost a decade.

In the long distance ski races—as in jumping—Norway have held the hegemony, occasionally challenged by the Finns. It was in St. Moritz in 1928 that Sweden first broke through this tradition by taking the first three places in the Ski 'd king the

the 50 km. (31.1 mlas) race seros the mountains. The Worder entablished their supremsey this year, leaving behind both Norway and Finalda. They emphasised the Norway and Finalda. They emphasised is km. (the fourth Swele coming fifth) and is km. (the fourth Swele coming fifth) and to man fifth in the 6 km, with another work man fifth in the 6 km, with another while conditions were perfect in the shorer one, a fronce-over track presented the skern, with a difficult task in the "Manging the state of the same and the skern, with a difficult task in the "Manging the same and the skern of the skern, with a difficult task in the "Manlet to many falls, a Finalth rumer crashing into a tree and breaking a thing. The visitor, Skileng," He have won every great interational championship from 10 to 90 km.

Remarkable, also, was the performance of the Swiss, Schild, who was the only non-Scandinavian to finish in the first six. The vitable of the same of the sountryman, Hedlund, won the same race in 1928 at the same place (St. Morizy), though not over the same course. But then, six races can never be really compared.

The Finn, Helkku Hasu, was a great surprise in the 18 m. race (one leg of the Combination), Finland having greater exceptions of Laukhanne. All the Finns expectations of Laukhanne. All the Finns when the Jumping, although in the latter event the jumping, although in the latter event the Swude, Israelson, was in a class on this own. Stump (Switzerland) ranks beside the leading Schudinaviers. Lt. Elimater, who was replaced to the state of the Laukhanne and the Laukhanne Cambine.

In the 48-jumping, the Norvegian separate presents premised unmajored. Norvegians represent premised unmajored. Norvegians present premised present pr

Of the ski-relay it ought to be said that never before had the winning nation outdistanced the opposition to anything like the extent which the Swedes did on snow which was good at the start, but later, when a thaw set in, became rather difficult.

While Great Britain never took much interest in the Nordic events, the Alpine events might not have taken shape at all events might not have taken shape at well as the state of the state

What the leading downhill and slalom aces, nen and women, accomplish is almost beyond belief, and how they can keep their balance

on those bumpy slopes at that speed astonishes the layman and baffles the expert. They are real human express trains on skis. America won their first ski-nig victory in winter sports history when Mrs. Gretchen Frazer—considered one of the favourites for the downhill race—won the slalom, pig-talis flying.

up. In the figure-skeining the three victors of percentage in a class by themselves. As the control of percentage in a class by themselves, artistic to the aerobatic was never so clarity solutionable. The The Syster-old Americans, desired the second of t

In the Pairs the ice was deplorable, but the winners, Mile, Lannoy and M. Baugniet, were harmony and rhythm personified. Great Britain's first pair, D. Silverthorne and his sister, Miss W. Silverthorne, finished fifth.

The speed-skating suffered more than

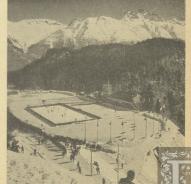

most other events from the weather conditions. Under normal conditions most, if not all, Olympic records would have been shattered, and at least one world record, too. As it was, the first three bettered the Olympic mark in the 1500 m. rese, the only of the properties of the special state of the speaking, the Norwegians dominated the seene. Finiands only skater of world class was Parkinen, world champion 1948, and for the first time Sweden won a gold medal

The British staters had been to Norway to practise for open-air competition. J. D. Cronsbey was 25th in the 500 m., being 2-8/10th seconds behind the winner. In the 1,500 m. H. J. Howes was 25th and 5-4/10th seconds behind the winner. Cronsbey was 11th in the 5,000 m., but the 10,000 m. was spoilt by a thaw and the carly skaters (order is ascertained by placings in previous races) had en advantage.

Bobsleighing is not universally practised, due to the fact that many countries do not have the necessary facilities, but it has always been on the Whiter Sports Olympic programme. The RAJF, Winter Sports Association was entrusted with finding the British crews for the Bobsleigh events, and they left for St. Moritz a month before the opening for practice.

The Skeleton Race can only be held when

the Winter Games are at St. Moritz because there is no other Cresta Run. There had been no Cresta riding since 1939 until the winter of 1946-47, and the run itself for (continued overleaf)

An ice-hockey match in progress during the Vth Winter Olympic Games

The Winter Pentathlon and the Military Ski Patrol were not official competitions but were listed as demonstrations. In the Military Patrol race Switzerland won from first three places. Major Allhusen (Gr. British competitor, and it is of interest to with a record score of 16 points. MILITARY PATROL AND PENTATHLON RESULTS

Great Britain, having no natural facilities for Winter Sports, was somewhat handi capped, and each Association endeavoured to provide out-door competition for their representatives. Thus the team arrived competitions in Europe or having undergone training on the Continent. Further, each governing body had to make its own case with the Bank of England for foreign exchange. There was no co-ordinating committee of the British Olympic Association, and this was found to be a mistake. For future Winter Olympic Games it has been decided that a special committee of the Council should be formed to organise

medal, one second, and one third. However, when it is realised that 14 countries in all failed to win a prize medal, it must be acknowledged that to win two third hnish all four in the Skeleton (Cresta) race

WORLD SPORTS is published every month and can be obtained in all countries. It costs 16; and an annual subscription, including postage from London to your address, costs ONE POUND. You can become an annual subscriber by sending £1 with your name and address to the publisher, "World Sports," 184, Fleet St., London, E.C.4.

EXTRA VITAMINS FOR THE EXTRA STRAIN

The carefully calculated rations which are current today are based upon the average needs of the average person. Athletes, however, and those regularly taking part in active sports, are making more-than-ordinary demands upon their energy and reserves. This can in some measure be

met by supplementing the vitamin supply with Vitamin Quota capsules.

Each capsule supplies approximately half the daily requirements for an active man or woman of the essential vitamins A and D, B1, B2, C and Nicotinamide.

CROOKES VITAMIN QUOTA

Bottles of 28 capsules 5/-, 100 capsules 15/- · Obtainable only from chemists
